When a battle with Alzheimer, on September seventeen, 1996, Lolo Fernández died in a very Lima hospital at the age of eighty three. It had been a great loss to South America's sport.

Fifa World Cup 2018 Lolo Fernández died within the mid-Nineteen Nineties, however the legacy of this Olympic carries on. He was thus advanced for his time and place. A man that invariably worked with love for his homeland country of Peru and a private hero of mine.
