

**Supernova LEDs – Quality LEDs for
your Car and Truck**

Find LEDs for your Ride!

About Us

Supernova LEDs has been working with LEDs since 2004, and started manufacturing our own LEDs since 2008. We know the trade secrets, traps, pitfalls, manufacturers, LEDs, and science behind it all. Let us do the research for you! We know that not everyone wants to figure out what LEDs are perfect for their car. From the bulb type to the LED type to the color, to the number of LEDs, to even the visibility angles of LEDs, it can be a bit overwhelming.

Who makes the Supernova V.4, V.4 X, and V.4 Perfect Fit LEDs?

Supernova V.4

Supernova V.4 X

Who is Supernova LEDs LLC?

We are a Texas based company that has been manufacturing, selling, and distributing LEDs under the Supernova name **since 2010**, focusing on high quality LEDs for automotive applications.

As time went on, we have grown bigger and bigger, and becoming more known for our high standards of brightness and quality. Our manufacturing scale has also grown from manufacturing modest quantities to manufacturing pallets full of LEDs and selling on Amazon and eBay.

Supernova LEDs **has sold over 500,000 quality LED conversions** since 2010 (as of 2021).

Why does it matter where I buy my Supernova V.4 LEDs from?

Imitators and Counterfeit LEDs are out there. There are competitors like Headlight Revolution¹ that attempted to **steal** our Supernova name and sweep it from under us. Fortunately, their efforts were not successful and have rebranded their LEDs to the "S V.4"¹ LED, shortening the Supernova to just "S". We are not affiliated with Headlight Revolution. You will notice that their bulbs are **suspiciously similar** to our Supernova V.4 X headlight models.

We pride ourselves in using only the highest quality LED chips and components in our LEDs. Settle for nothing else.

What can I do? Where can I purchase genuine Supernova V.4 LEDs?

Make sure you purchase from our website (www.SupernovaLEDs.com), our [Amazon store](#), or our [eBay store](#). If you have any questions on the legitimacy of the Supernova V.4 line of LEDs, please contact us or send us a message via Live Chat!
