call dr ken on 0736279375 -We Help You Abort / Terminate an un-wanted pregnancy Today. we do for you, especially if you stay around Gauteng. It is very quick and pain free. It is 98% successful. Let us Help You Today. This procedure is legal under certain circumstances. The procedure is one of the safest operations, and up to 29 weeks, is safer than giving birth. we conduct abortions on demand up to the 30th week of pregnancy. Abortion is a process of ending a pregnancy. If pregnancy is confirmed and is below twelve weeks, then abortion pills are best to expel the contents of the uterus Abortion pill is widely known as RU-486. RU stands for Roussel-Uclaf (the initials of the pharmaceutical company) and 486 is a lab serial number. Using abortion pill is a type of abortion that can be performed using a combination or a single pill of two medications, mifepristone and misoprostol. These two pills can terminate pregnancy in about four hours. It is safe and effective when used within twelve weeks of pregnancy. These medicines are either taken orally or vaginally. Mifepristone blocks the hormone progesterone levels that are needed to maintain a successful pregnancy. Due to the blockage of this hormone, the uterine lining begins to shed, the cervix get soften and bleeding (an indication of abortion) may occur. This is when the termination of pregnancy is taking place and it is within three to four hours of taking the pills and you are done. The bleeding may be light much like spotting towards the end of a menstrual period or heavy bleeding branches in randburg,pretoria,johannesburg,springs,alexandra,diepsloot,tembisa soweto,sandton,cresta,cosmo city,honeydew,rosebank,fourways,lanseria,northgate,northcliff,melville,benoni,bryanston,morningside,rivonia,wendrand ,daveyton,linden,randparkridge, call: DR. ken 0736279375 :
