## CCTV Installations Across United Kingdom

Welcome to CCTV Smart Systems your local CCTV Installations Company that has over 20 years in Security Systems. We have been providing homes and businesses with CCTV systems across the United Kingdom. We use the latest technology to give you an easy to use, reliable and robust system and also have built our business on our local reputation and word of mouth from our customers. All because we love what we do and that's helping you.

We are trained professionals who understand how to match the latest security technology to your budget and ensure your complete satisfaction. We supply the widest range of latest CCTV technology allowing you to monitor your home or business from your smartphone, tablet or your PC, from anywhere in the World. Our support is second to none, we are available via the telephone and, because we are local, we can be with you quickly should you require on-site support.

To discuss your CCTV requirements and receive a **FREE Quote**, please call us on

**0800 013 2341**

The CCTV Installations industry has come a long way in the last 10 years, from the 420TVL, 600TVL or even the 700TVL dinosaurs, so if you are one of those who in the past few years have purchased the **old analog Surveillance System** that used to come with the small cameras and the short pre-made wires that just did not look professional no

matter how you tried to install it, its time to change your cameras, that has become a thing of the past. In today`s age HD, Security Cameras are the perfect way to get a clear picture of a thief in the darkest of gardens. They come in 720P or 1080P resolution. The beauty of our HD technology is that you do not have to replace the wires, just unplug the

In today`s age HD, Security Cameras are the perfect way to get a clear picture of a thief in the darkest of gardens. They come in 720P or 1080P resolution. The beauty of our HD technology is that you do not have to replace the wires, just unplug the *old camera and plug the new HD Security Camera*. Or if you need something even better we can offer you an IP Megapixel camera that can work as a Wireless Night Vision Spy Camera as well all the up to more than 5 Megapixels. Make sure to give us a call today at **0800 0132341** to speak with one of our experienced surveillance camera installers.

## Security Services and What we Do

CCTV Smart Systems and Security Products offer Professional Security Installation services that vary and dependent on the type of job you are looking for. Our professional contractors have the skills to craft a complete security system from Alarm systems, access control systems to video surveillance & security camera systems. A typical CCTV Installation for Home security cameras can usually be undertaken by a single man install team (a single family home up to two stories).

For Commercial/ Business, CCTV installation services we recommend a floorplan overview and/or a site survey. Standard equipment used during a CCTV Smart Systems Security Products installation service can include but is not limited to, a security recorder (DVR/NVR), CCTV Security cameras, access control panels, access control readers, alarm sensors, power and video cabling. On our initial walk thru, we can address all security requests from alarm systems, to access control to surveillance. During our walk-through and consultation, our installers will create, design and estimate the system that will best fit your budget and CCTV Installations security requirements.

CCTV camera price

## Need Professional Installation Services?

Do you want your home to be protected against theft and break-ins without the burden of high monthly fees? Don't wait until your family is a victim of crime. Fill out the easy questionnaire and we will recommend you an installation company within 24 hours for a free home security needs assessment to see how affordable a video security system can be.

## Best security cameras

Today in a most have, in the past an alarm system was enough to secure your home, but today with the changing demographics, and constant fluctuation of the economy security is a sensitive matter even for a home in gated communities. Best security cameras and home surveillance system gives you backup of those undesired events that might take your peace away, with best security cameras the DVR unit will maintain records for a time that will give you the chance to recover that footage and give it to your local authorities when have the need to proof those situations that no one wants to mention. Call the experts of CCTV Installations Video Security to give you an estimate of a Home Security System for your property.

Hikvision Bullet Camera CCTV Installations UK

## Outdoor security cameras installation

An Outdoor Security Camera system, are a purchase decision always involves installation, and no one better than CCTV Installations UK Video Security to guide you make the best decision. It is true that CCTV is a technology that has been under development for many years, and today you can find pretty attractive prices for Outdoor Camera packages, but the true is that many of those extremely low prices are just the lowest quality equipment meant to suffice a demand of Cheap Outdoor Cameras. So our best recommendation is to trust your Security Outdoor Cameras Installer and get professional Outdoor cameras instead of taking short cuts that for sure will bring you back to spend in a professional surveillance system.

Not every CCTV camera is the same if you were a photographer could've been more aware of the multiple variations of the technical specs of a camera. surveillance cameras have to be chosen accordingly to the required angles distances, and lighting conditions. Most first time buyers fall into the trap of purchasing a camera just by comparing the resolution.

**HD**  
**1080p**

HD CCTV Dome Cameras

## High Definition Dome Cameras

In the past having a security dome camera was a privilege of a corporation, government facility or a luxury home, but not anymore. With the increasing population in urban areas and the changes in the economy, having a security dome camera is a must for any house office or warehouse, security dome cameras are not anymore a matter of a luxury security device, but part of the surveillance equipment that you must have to protect your property. We can mix your Home Security Dome Cameras and Office Cameras in a single viewing Platform so you can see both locations in your Smart Phone, Tablet or Computer, check with us about the technical requirements.

Surveillance cameras not only can be compared to their resolution but also by cheap set, Infrared distance, sensor type, water tolerance, chip's brand, and much more, but we understand that taking all these specs in count to do a one-time purchase can be overwhelming, so get a professional Surveillance System from a specialised place that you can trust and give alternatives and support.

## How HD security camera system works for you

- **HD security camera** gives you the mental relaxation when you are out of home or your workplaces.
- **Sometimes this** surveillance method is used to control the criminal activities.
- **In school**, it is used to track the activities and unacceptable student behavior.
- In Shopping Centers and retailing shop, it is used to monitor the buyer and sellers' activities, and to track the other entire undesired incident so that the offender may be punished easily.
- **HD security cameras** are frequently used in transportation system for the safety reason.

## Why are we better from others?

- We install and maintain industrial, commercial and residential **HD security camera installation service** with much more professionalism and great attention.
- Before installing this equipment, we visit the site which adds no additional charges.
- All our technical staffs and engineers are fully trained and highly skilled with immense professional knowledge and experience so that they may meet all the required needs of the clients.
- We always assist our customer at every stage without any charges.

## **PTZ Camera Installation**

PTZ Cameras are recommended for areas where there are far objects to cover, and locations where would be impossible to set as many cameras as required to cover the entire place, like parking lots, constructions lots, or similar places. these moving cameras are also popular for convenience or retail stores where there will be a security person tracking multiple areas from a Security Room.

We offer PTZ Security Cameras installation in our CCTV Service Coverage Service Area, call us for more information.

## **PTZ Cameras**

When you start looking for a PTZ camera you might or might not be sure what the PTZ term stands for in the CCTV language, PTZ stands for ( Pan Tilt Zoom ), meaning that these three words describe the most relevant features of this robotic style cameras. PTZ Cameras are a great tool for those locations where there is not fixed point to watch, and there are many variables or situations that you want to cover with just one surveillance camera.

## **PTZ Camera Types**

PTZ cameras come available in Analog technology ( TV Lines ), CVI Technology ( High Definition Analog) TVI ( High Definition Analog ), and IP. All PTZ cameras Pan and Tilt by default but the main difference to keep in mind when choosing a PTZ camera is the zooming capability, the most common PTZ cameras can zoom in a range from 10x ~ 32x, and the zooming is also different if is digital or optical, being optical the best zooming resolution, as it means real zooming vision made through the camera lenses, while digital zooming is made through software.

## **PTZ Camera Features**

- Panning feature, that allows these cameras to rotate 360 degrees be able to get back to their original position.
- Tilting feature is the option of going up and down even during the Panning cycle without creating any delay or affecting the panning feature.
- Zooming will give your PTZ Camera the capability to zoom in, and zoom out objects

## **CCTV Monitors For DVR**

### **DIGITAL VIDEO RECORDERS (DVR)**

The DVR is the heart of any system. It provides recording, playback, and internet interface. With its built-in hard drive the DVR will record continuously without tapes or supervision.

We carry a large selection of stand- alone DVR's and computer based DVR's capable of recording from 1 to 64 cameras simultaneously.

### **MONITORS**

We offer many types of monitors including 4K LCD flatscreens which can be wall or ceiling mounted if required. So contact CCTV Installation today.

CCTV Monitors

- Camera network
- Hard drive on which to store recordings
