

**PLEBISCITE IT SERVICES PVT. LTD.**  
Blockchain Solutions

**“We believe that the economy works best when it works for everyone and Blockchain is here to help build one.”**

# Introduction

**PLEBISCITE IT SERVICES PVT. LTD.** is a web and mobile application development company known for providing world-class IT services to entrepreneurs to meet the growing demand for innovative, futuristic technology. We have developed the most advanced blockchain architecture in the market. With our best services of IT business solutions, we don't make clients, we build last long relationships. And we love it! Let's do great work together to continue this passion.

***"If you're looking for an opportunity to learn about the blockchain and how to integrate it into your industry, you're in the right place."***

Plebiscite IT Services Pvt. Ltd. is a IT service provider company established in 2017. Plebiscite is group of blockchain enthusiastic peoples who think "Blockchain is future". With the ability to distribute but not duplicate digital information, blockchain technology has created the backbone of a new type of Internet. Originally developed for Bitcoin digital currency, the technology community now finds other potential applications for this technology.

***"Blockchain is to Cryptocurrencies, what the internet is to email. A massive electronic system, on top of which you can build 'N' number of applications. Currency is just one." - George Michael, CEO***

## What is Blockchain?

Blockchain is exactly like a ledger or book that a bank maintain to record all the transactions of its customers. But the similarity ends soon. In a bank, the ledger is controlled by the bank itself. Only the bank can see the transactions. The bank has its own security and access system to secure the book and complete transactions.

In blockchain, a copy of the ledger is shared among thousands of participants worldwide, also known as miners. Even you can become a miner by simply downloading Bitcoin open source software. New Bitcoin transactions have been added to the consensus of most miners. Once a transaction is added in the blockchain, it can never be removed or modified.

***“The technology likely to have the greatest impact on the next few decades has arrived. And it’s not social media. It’s not big data. It’s not robotics. It’s not even AI. You’ll be surprised to learn that it’s the underlying technology of digital currencies like Bitcoin. It’s called the blockchain.”***

## **Our Services**

### **1. Blockchain Development**

At Plebiscite IT Services Pvt. Ltd. we discuss, think and find innovative ideas to create innovative blockchain concepts and turn them into real-world business solutions that demonstrate our capabilities and potential in Blockchain World.

Our blockchain developers and experienced analysts can help entrepreneurs and individuals create a completely new block chain and develop new Bitcoin-related concepts, such as cryptocurrency protocols to address blockchain vulnerabilities.

#### **Why Plebiscite?**

- i. Team of Experts-** Our experts have served clients from diverse industries and geographies and have successfully validated the key issues in blockchain development.
- ii. Reliability, Authenticity & Security-** Our product maneuver involves the extensive use of cryptographic identification and cryptographic hashing, making your product an ideal and secure solution.
- iii. Best Service-** We offer a blockchain-as-a-service (BaaS) service with the ability to improve your business beyond the competition in the market and protect your data with the highest level of security hash functionality.

### **2. ICO Development**

A Initial coin offering is an innovative crowdsale approach to financing your project without the intervention of third parties. Our cryptocurrency development services provide comprehensive technology support for your ICO, from concept token design, ICO smart contracts and ICO cabinets, to website deployment and maintenance of your product infrastructure.

With a history of creating complicated templates for cryptocurrency tokens, we ensure that your ICO token development is completed before launching your ICO.

**i. Token Development-** We design and build optimal models for cryptocurrency tokens and prepare them in fixed time for the launch of the ICO.

**ii. ICO Marketing-** Strategic marketing dedicated by our team of experts to give you a head start to succeed in the development of ICO.

**iii. Community Building-** It's not art, it's hard work. It's about being responsible and being able to respond with clarity and pre-planned responses. We build transparent and independent communities across various categories.

### **3. Cryptocurrency Exchange Development**

Today, a large number of cryptocurrency exchanges are required because of the high transaction volume of users around the world. The traffic load on cryptocurrency exchanges is such that they refuse to take new registrations. Such an exchange is already working optimally.

Plebiscite IT Services is a developer of cryptocurrency exchange and a popular name for Exchange exchange solutions and custom cryptocurrency services. Our team of experts, based in India, has a lot of knowledge reading exchange scripts and cryptocurrency trading. With a digitized business, you need to deepen your roots, so it's time to get the excellent crypto-currency software and crypto currency exchange software solutions from us to meet your ultimate needs.

The key benefit is that the Plebiscite IT Services has a good hand in development of highly advanced crypto currency trading software goes hand in hand with the crypto currency protocol, providing you private, secure and reliable crypto currency exchange software.

#### **Why Plebiscite?**

**i. Wallet for Cryptocurrencies-**

**ii. Blockchain Node Setup for available Cryptocurrencies**

**iii. Payment Gateway for deposit of Fiat Currencies**

## 4. Dapps Development

A new model for building successful and massively scalable applications is emerging. Bitcoin led the way with its open-source, peer-to-peer nature, cryptographically-stored records (block chain), and limited number of tokens that power the use of its features. In the last year dozens of applications are adopting the Bitcoin model in order to succeed. Ethereum, Omni and the SAFE Network are just a few of those “decentralized applications” that use a variety of methods to operate.

At Plebiscite IT Services, our passion for emerging technologies has allowed us to track trends in blockchain and distributed applications (DApp). Our expert team of blockchain innovators and DApp developers can help you create a DApp with blockchain technology to deliver tangible and lasting benefits to your users.

## 5. Digital Solution

Our face is the index of our mind. Services offered by the company include

- Web Development
- Data Management
- Quality Control
- Search Engine Optimisation (SEO)
- Email Marketing
- Social Media Strategy
- Website analytics

The four dedicated pillars, including (marketing strategy, business integration, system architecture and project management) have always symbolized our strength and vigour.
