### Ladder Mitts

**£12.75**

This simple idea will increase safety and protect your customer's property. Ladder Mitts are strong Urethane foam pads, which push on to your ladder to protect the surface against which the ladder is set. The soft composition eliminates the risk of damage from chipping, scratching and bending, while at the same time reducing the risk of side movement particularly on shiny surfaces.

## Spot-Lite Fibre Glass

SPOT-LITE

FROM  
**£60**

Glass Fibre - The most economical day-to-day pole for most standard ground and first floor properties. A short pole like this will in fact often earn the majority of your income as a window cleaner. You will notice the high level of workmanship and quality materials used to make a pole that will last. Fibre Glass poles are known for being heavier but this is still an exceptionally light pole for its size.

Hybrid - Considered by many window cleaners as the ideal choice of pole construction for mid-size poles. Combination of both Glass Fibre and Carbon materials gives you some of the weight saving and rigidity of Carbon but but keeping the price nearer to Glass Fibre! Excellent workmanship and quality materials used to make a pole that will last. When comparing the weights to glass fibre, it might only look like a few grams difference in weight but you will notice this when using a pole every day!

## Modu-Lite Carbon Pole

FROM  
**£385.70**

The brilliant new Carbon Modulite Pole is a flyweight pole with heavyweight capabilities. It's modular in design, so you can easily add or remove sections to suit your work-height. The sections are only 6ft long for manageability and the widest section is only 49mm in diameter, so you don't have the wide-grip discomfort normally associated with most extreme-reach poles, often up to 60mm. The pole hose is external, but kept in place by twisting it once round each section you add, and securing it with the quick and convenient Velcro straps supplied. Using the number of sections to suit your working height: the 36ft bare pole, for example, weighs in at a mere 1.3 kg, using six sections. And even when you move up to the 60ft you're only lifting an incredible 2.6 kg. Less than half the weight of a conventional telescopic pole. Among the lightest 60ft poles on the market. Comes complete with angle adapter, 17" lightweight alloy gooseneck and 12" double trim brush.
