

## We have the right size for you

Exemplar/ Libero Size	Measurement A Seat Width	Measurement B Arm Rest Width	Measurement C Seat Depth	Guidance Notes
Size 1	440	410-460	450-480	Average size, but with a slim armrest and seat width
Size 1L	440	410-460	490-520	Tall size with a slim armrest and seat width
Size 2	500	470-520	450-480	Average size, with standard armrest and seat width
Size 3	500	470-520	490-520	Tall size with a longer seat, standard arm and seat width.

NB. 5D armpads reduce the armrest width by 35mm each side (70mm in total).

### MEASUREMENT GUIDES

#### \* Measurement A (Seat Width)

Find this measurement to guide you to the right seat width. Measure the hips from the outer point to outer point.

#### \* Measurement B (Armrest Width)

Find this measurement to guide you to the right armrest width. Measure the distance between the elbows (taken with arms resting by the side of the body).

#### \* Measurement C (Seat Depth)

Find this measurement to guide you to the right seat depth. Measure the total length of your thigh, from the base of your spine to underneath your knee. NB: This measurement should be accurate to avoid the seat depth being too deep.

GAS LIFT	Measurement D
1	Less than 440mm (Footrest Required)
1	440-540mm
2	540-640mm

#### \*Measurement D: (Sitting Height)

This will give the chair height required. Measure from the floor up to behind the knees (the user should be at a sitting position with feet flat on the ground, wearing everyday shoes).
