BRANCHES IN ALL MAJOR METROPOLITAN CITIES

Entrance Matting

Choosing Entrance Mats. How to make an informed decision.

In this catalogue there are close to a dozen different types and styles of entrance mats. Making a decision as to what is the best entrance mat for your facility can be difficult when faced with such a wealth of choices.

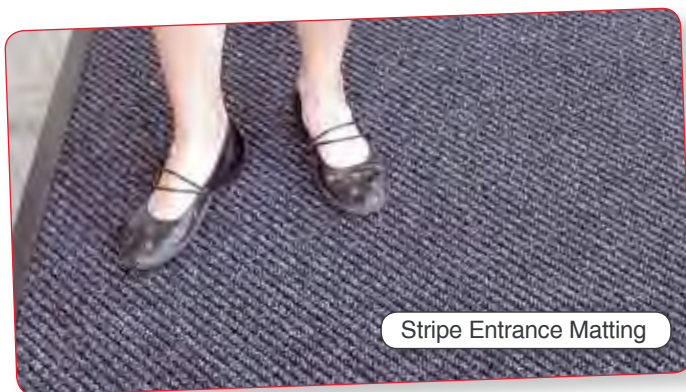

There are a number of critical criteria if the most suitable entrance mat is to be selected.

Traffic

Firstly the amount of traffic has a major bearing. For instance, installing a mat designed for a low or medium traffic environment in a major shopping centre where foot traffic passing over the mat is numerically very high, means quick wear and quickly reduced efficiency as the mat wears. Wear does not only mean destruction of the surface material but also rapid flattening through developed traffic channels.

Fibre Weight

There are two determinants here. Firstly, the amount of fibre constituting the surface determined by its weight and generally expressed in ounces per square yard or grams per square metre. The greater the weight of fibre the longer the potential life. In this catalogue you will find mats ranging from less than 600gms per sq m to as high as 2000 gms per sq m.

Fibre Structure

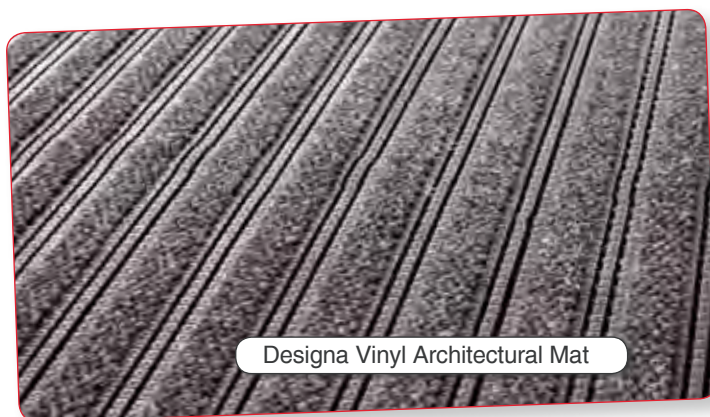

Then the structure of the fibre. For instance if the fibre is tightly punched there is a greater resistance to traffic patterns and flattening than if loosely punched.

Environment:

In addition the environment outside the facility has a bearing because the type and quality of the dirt being carried into the building can help determine which mat is better suited.

Mat Size

The size of the mat chosen, particularly in length, determines the effectiveness at removing dirt from shoes. The more often shoes make contact, the more dirt is removed. It takes as much as 10 metres of matting to remove 99% of dirt. 6 metres will remove about 80% and 4 metres of matting will remove about 60% of dirt from shoes.

Architectural Mats

There are also so-called "Architectural" mats, often specified for new buildings, which have their own positives and negatives and are often specified in areas where they will not be ideal. It can be valuable to seek advice prior to such specification.

Consultants

Each facility should make a decision based on its own particular criteria. Because the assessment of all criteria can be complicated, Mat World offers the services of skilled, trained consultants to help the decision making process. There is no charge nor any obligation in utilising the services of these consultants who are available at any of our facilities in Sydney, Melbourne, Brisbane, Perth and Adelaide.

Where To Use

Wherever entrance mats take a real beating from very heavy traffic:
Shopping Centres, Public Buildings, Office Blocks, Banks, Hospitals, Airports.

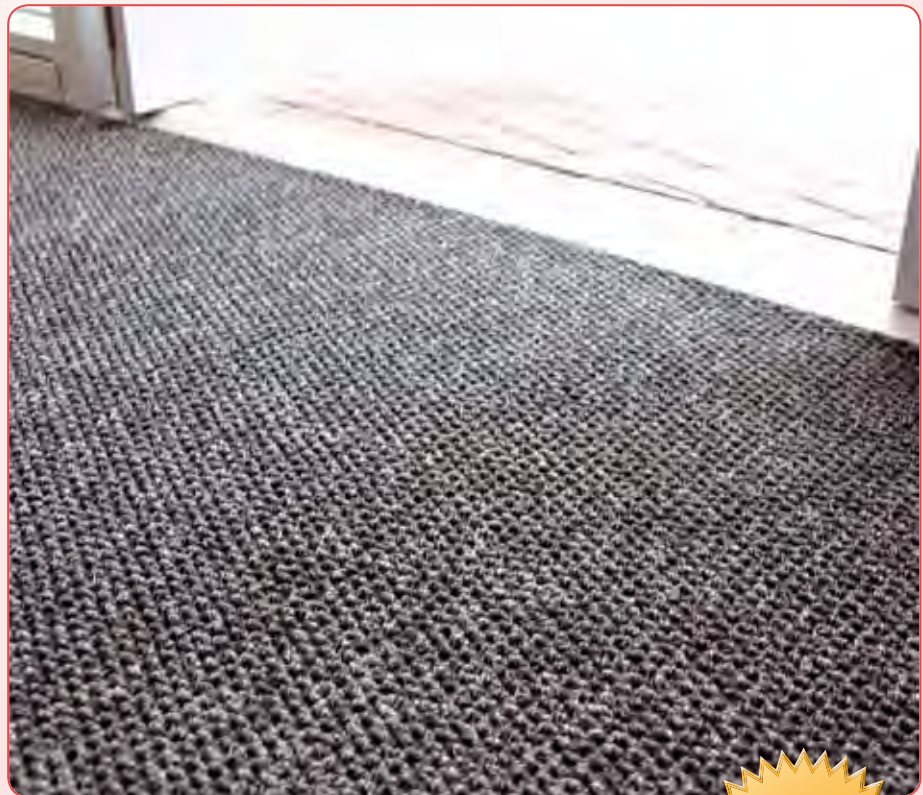

Hydrasorb

The *real* heavy duty matting

- Heavy duty 59oz carpet fibre – up to three times the weight of other matting – takes really heavy traffic for years
- Heavy duty edging – twice the weight of regular edging yet trolleys ride up with ease. Reduces hacking, cracking, or splitting of edges
- Slip resistant gripper back increases safety
- Absorbs and holds huge amounts of water on wet days yet dries quickly
- Cut to any width, shape or size ... or recess.

Heavy duty edging bonded and stitched for added security and life.

Custom made mats to any size

Thickness	Fibre Weight	Colour	Sizes	Code
10mm	59 oz/sq yd 2000gm/sq m	Charcoal, Burgundy, Brown	Rolls 15m x 2m	MSN215CL

Stripe

- Highly attractive diagonal stripe design for that different, contemporary look
- Heavy 41 oz fibre weight takes punishing traffic and keeps looking good
- Tough vinyl backing stops mat distortion
- High water holding capacity for wet weather application
- UV resistant for outdoor use.

Custom made mats to any size

Thickness	Fibre Weight	Colour	Sizes	Code
10mm	41 oz/sq yd 1400gm/sq m	Charcoal	Rolls 25m x 2m	MVS225CL

Super Brush

- 34oz carpet fibre – twice the fibre of other mats with a similar looking design
- Heavier fibre weight means far greater resistance to wear
- Bi-level design brushes dirt off shoes effectively
- Vinyl backing stops mat distortion
- Great water holding capacity – excellent wet weather mat.

Thickness	Fibre Weight	Colour	Sizes	Code
10mm	34 oz/sq yd 1150gm/sq m	Charcoal	Rolls 25m x 2m	MBHD225CL
			0.9m x 1.5m	MBHD3660CL
			1.2m x 1.8m	MBHD4872CL

Custom made mats to any size

Waterhorse Diamond Premium

- Attractive contemporary design
- Reinforced raised moulded nibs in rubber backing ensure mat surface scrapes dirt as well as moisture
- Extremely hard wearing polypropylene top surface
- Available in mat sizes edged all round or custom sizes made to order.

Thickness	Fibre Weight	Colour	Sizes	Code
7mm	24 oz/sq yd 680gm/sq m	Charcoal	Mats 1.2m x 1.8m	MP4872DCL

Custom made mats to any size

Super Chevron

- Bi-level herringbone pattern ribs brush dirt from shoes
- 34oz carpet fibre far exceeds weight of other similar design mats, ensuring long, traffic-pattern-free life
- Excellent wet weather mat with high water holding capacity.

Thickness	Fibre Weight	Colour	Sizes	Code
10mm	34 oz/sq yd 1150gm/sq m	Charcoal	Rolls 25m x 2m	MVHD225CL
			0.9m x 1.5m	MVHD3660CL
			1.2m x 1.8m	MVHD4872CL

Custom made mats to any size

Mat World Aluminium Architectural Mats

- Aluminium sections with carpet-faced mat inserts
- Strong, heavy weight
- Made to fit mat recesses – any sizes
- Sound absorbing vinyl inserts under.

Custom made mats to any size

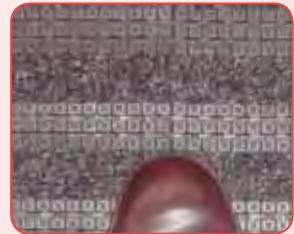

Thickness	Colour	Sizes	Code
Standard 12mm*	Charcoal	Made to measure, any size.	PMARCMAT

*Can be made to suit recess depth.

Designa Vinyl Architectural Mats

- The perfect mat for architectural specification
- Tough plastic frame with carpet-faced mat insert strips
- Frame will not buckle or bend in normal use
- Can fit existing mat recesses or can be used as stand-alone mat.
- Unaffected by moisture.

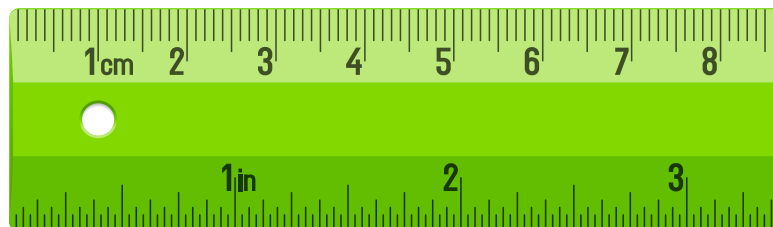

Custom made mats to any size

Thickness	Colour	Sizes	Code
Standard 15mm*	Charcoal. <i>Many other colours available.</i>	Made to measure, any size.	MWDMSMBK

*Can be made to suit recess depth.

Made to Measure

Just tell us the size of the mat you need and we will quote you. For a recess in the floor (a mat well) the mat will be provided slightly over-size for cutting to fit on site. If uncertain, ask our specialist consultants for advice.

Kleensorb Regular

- Ultra-dense polypropylene fibre
- Moulded nibs in the rubber backing help stop traffic patterns from flattened carpet
- Nitrile rubber backing is extra tough
- Rubber borders contain any moisture deposited on the mat
- Cleated backing controls mat movement.

Custom made mats to any size

Thickness	Fibre Weight	Colour	Sizes	Code
8mm	24 oz/sq yd 680gm/sq m	Charcoal	0.86m x 1.47m	MH3660CL
			1.14m x 1.73m	MH4872CL

Kleensorb Welcome Mat

Specifically designed for anyone requiring a quality entrance mat incorporating a 'Welcome' message, this mat uses a print process so that the red 'Welcome' appears in the same Kleensorb material as the charcoal background mat. The result is a most appealing 'Welcome' mat.

Thickness	Fibre Weight	Colour	Sizes	Code
9mm	24 oz/sq yd 680gm/sq m	Red on Grey	1.2m x 1.8m	MH4872WE

Coir Mats

- Natural coco fibre with excellent scraping properties
- Fibre bonded to heavy duty PVC backing
- Best installed in recesses
- Range of four thicknesses to suit most existing recesses
- Custom made to fit existing recesses

Thickness	Sizes	Code
15mm	Up to 2m wide	PMCOIR215
18mm		PMCOIR218
23mm		PMCOIR223
28mm		PMCOIR228

Wayfarer Backed

- Durable vinyl loop surface permanently bonded to a solid sheet vinyl back
- Removes dirt and moisture from shoes, traps it beneath the mat surface
- Dries quickly and resists mildew in high moisture areas
- Textured, cushion surface prevents slips; solid back keeps mat in place
- Optional edging available.

Thickness	Weight	Colour	Sizes	Code
10mm	95 oz/sq yd 3250gm/sq m	Pewter	Rolls 12.2m x 0.9m	MW403B

Mini-Mats For Smaller Entrances

Wayfarer: Sometimes called a spaghetti mat because of its random mesh of vinyl loops bonded to a vinyl backing. Excellent dirt and grit collector.

Colour	Sizes	Code
Pewter	610 x 914mm	MW236B

Brush Rib: Bi-level carpet face bonded to a vinyl backing. Traps dirt and water. Washes clean easily and dries quickly.

Colour	Sizes	Code
Grey, Slate	432 x 736mm	MB1729
	533 x 914mm	MB2136

Where To Use

Motels, Hotels, Internal Office Doorways.

Sweetie: Unedged, vinyl backed, supplied as-they-come colours and styles for real economy

Sizes	Code
432 x 730mm	NX1729RG
350 x 550mm	NX1422RG

SCIENTIFIC STUDY CONFIRMS BENEFITS OF ANTI-FATIGUE MATTING

Prolonged standing on hard surfaces can lead to long-term circulatory problems including varicose veins resulting in pain and suffering.

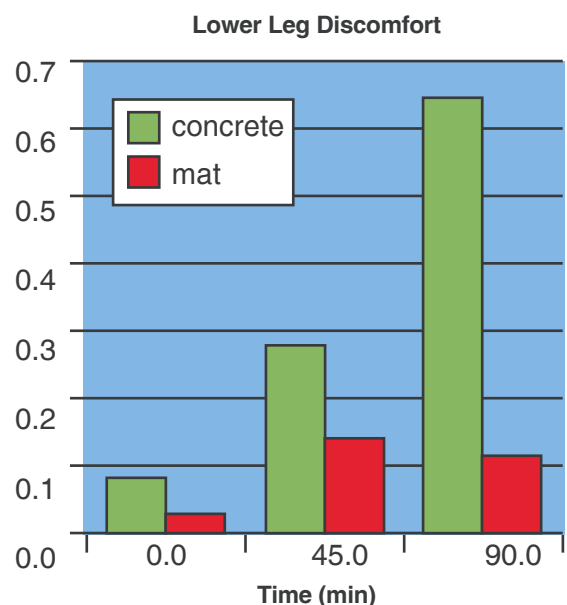

Long periods of standing cause physical fatigue including pain in feet, legs and back, neck and shoulders.

A scientific study was conducted at Loughborough University Human Sciences Department in England comparing the effects on comfort and fatigue resulting from standing on floor matting on concrete floors and standing directly on the concrete floor.

Both subjective and objectivity tests were performed. The results showed significant benefit to users of anti-fatigue mats compared to standing on a concrete floor.

In addition the longer the period of standing the greater the benefit for users of mats.

What is special about kitchen mats?

To succeed in a commercial kitchen environment and not break down quickly, mats require a high percentage of Nitrile rubber.

Natural rubber has poor resistance to oils, fats and greases. At least 40% Nitrile content added to natural or synthetic rubber ensures far superior grease resistance.

In addition mats should drain well as there is a prevalence of liquid spillage in kitchens.

And, from a safety perspective, good ramping, with a gentle slope along all edges where traffic may walk on and off the mat, is an essential to prevent trips.

Also, for safety in the kitchen the top surface of the mat should be textured to reduce the chance of slipping.

With good housekeeping so important, ease of cleaning is also a very relevant factor.

Soft 'n Safe Solid-Top or Drainer

100% Nitrile Rubber Anti-fatigue Safety Mat

Where To Use

Commercial Kitchens, Butcher Shops, Food Processing Facilities, Abattoirs, Cold Rooms.

- The perfect kitchen mat
- 100% nitrile rubber ensures resistance to oily, fatty environments
- The rubber compound is resilient to ensure foot comfort when standing for long periods
- Choice of drainage holes where the environment could be wet, or solid-top for dry areas
- Surface treatment helps prevent slips
- Low profile to reduce the risk of tripping, plus a moulded ramped edge all round.

Thickness	Mat Style	Colour	Sizes	Code
10mm	Solid Top	Black	0.9m x 1.5m	MC1S366BK
	Drainer	Black	0.9m x 1.5m	MC1H366BK
	Solid Top	Blue	0.9m x 1.5m	MC1S366BU
	Drainer	Blue	0.9m x 1.5m	MC1H366BU

Cushion-Foot – Red

- Resilient grease-proof nitrile rubber resists oil and fat attack
- Eases fatigue of long hours of standing
- Large drainage holes ensure liquid spills disappear
- Built-in connectors on two adjacent sides for easy mat connection, allows any size mat to be assembled.
- Ramps in matching red or easy-see yellow (as illustrated) to help prevent tripping.

Built-in connectors – standard on Cushion Foot Red

Where To Use
Commercial Kitchens, Butcher Shops, Food Processing Facilities, Abattoirs, Cold Rooms.

Custom made mats to any size

Thickness	Mat Style	Colour	Sizes	Code
15mm	Modular	Red	0.9m x 0.9m	MC3636RD

Mat Accessories

Mat Edging

Can be bonded onto the backing of entrance mats to keep mats flat and help prevent tripping. Available in black:

Heavy Duty: For mats with very heavy traffic. 13mm high. 40mm extension.

Hi Profile: Rounded profile edging for longer life. 7mm high. 25mm extension.

Seaming Tape

Vinyl tape, 100mm wide for joining mats by bonding butted edges.

Bonding Adhesive

P.M. Bond is a 20g special bonding adhesive for use with mat edging and seaming tape.

Velcro Mat Grips

Pressure sensitive heavy duty Velcro. Attach to underside of the mat. The Velcro grips many (though not all) carpets to prevent mats “walking”.

Rolls 20m x 25mm or strips 170mm x 25mm.

Mat Grip Underlay

Attached beneath mats prevents mat slip on hard floors and many carpets. Rolls 73m x 1.5m cut to length or size.

Rubber Industrial & Anti-Fatigue Mats

**Wet Areas
and General
Purpose**

Where To Use

Wet Production Areas,
Assembly Line, Print Shops,
Behind Bars.

U Mat Runners

- 10 metre long rolls in choice of 0.9m wide or 1.8m wide
- Can be cut off the roll to make a “no joint” mat, any length up to 10m
- Drainage holes 25mm apart – ideal in wet areas
- Nibs beneath give anti-fatigue properties as well as raising holes for good drainage
- Low profile reduces trip hazards.

**Custom
made mats
to any
size**

Thickness	Colour	Sizes	Code
10mm	Black	10m x 0.9m	PMUM0910
		10m x 1.8m	PMUM1810

Rubber Industrial & Anti-Fatigue Runners

Where To Use

Industrial Work Areas, Machine
Shops, Wet Production Areas,
Behind Bars, Print Shops,
Potwash Areas.

Cushion-Foot – **Black**

**Custom
made mats
to any
size**

- All purpose mat with excellent drainage for wet areas through large drainage holes
- Good nitrile content ensures safe use with oils, fats and greases, cutting oils and lubricants
- Multi-nib back ensures comfort while enhancing drainage and cleanliness
- Resilient rubber for anti-fatigue qualities
- Ramps available in matching black or easy-see yellow (as illustrated). Can be attached to any or all sides
- Built-in connectors on two adjacent sides allow mats to be joined in any direction to make any size mat.

Thickness	Colour	Sizes	Code
15mm	Black	0.9m x 0.9m	MC3636BK

Dry Areas and General Purpose

Where To Use

Where wheeled carts or trolleys need to mount mats.
Where anti-fatigue standing in dry conditions is required.

Cushion-Foot – Solid

- Very comfortable anti-fatigue mat
- Suitable for wheeled traffic
- Grease resistant through high nitrile content
- Built-in connectors on two sides allows easy assembly of multiple mats to any configuration
- Trip prevention ramp an option in black or easy-see yellow (illustrated).

Custom made mats to any size

Thickness	Mat Style	Colour	Sizes	Code
17mm	Modular	Black	0.9m x 0.9m	MD3636BK

Soft 'n Safe Solid-Top or Drainer

100% Nitrile Rubber Anti-fatigue Safety Mat

Individual Work Stations

Where To Use

Machine Shops where oil, grease, cutting oil are used.
Motor repairers, Print Shops.
Laboratories.

- 100% Nitrile resists oils, grease that break down natural rubber
- Excellent resilience for anti-fatigue at static work stations
- Solid top or drainage hole choice for wet or dry areas
- Surface treatment helps stop slips, trips.

Thickness	Mat Style	Colour	Sizes	Code
10mm	Solid Top	Black	0.9m x 1.5m	MC1S366BK
	Drainer	Black	0.9m x 1.5m	MC1H366BK
	Solid Top	Blue	0.9m x 1.5m	MC1S366BU
	Drainer	Blue	0.9m x 1.5m	MC1H366BU

Individual Workstations

Where To Use

Industrial Workstations, Machine Shops, Print Shops, Potwash Sinks.

Safewalk Economy Mat

- Economy mat for general use
- Low profile moulded-in ramps on all four sides for safety
- Individual workstation size
- Large drainage holes get liquid spills away fast

Thickness	Colour	Sizes	Code
12mm	Black	1.5m x 0.9m	MG3660BK

Comfort-Zone **Black**

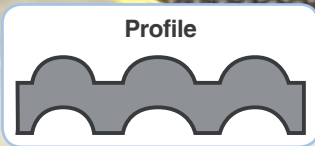

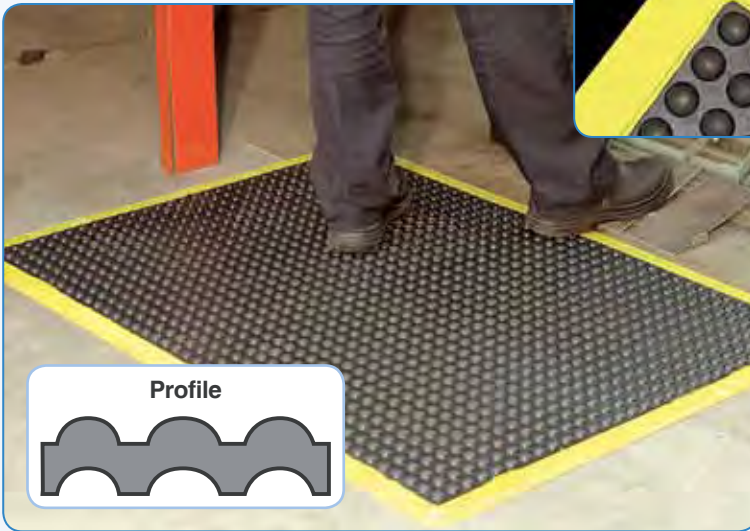

Where To Use

Industrial workstations including those where oils and greases are prevalent e.g. Machine Shops, Motor Repairers, Print Shops. Also Wet Areas such as Potwash Sinks.

- Rubber anti-fatigue mat with excellent drainage
- Superior stand-alone workstation mat
- Moulded in wide, ribbed ramps plus textured top surface for safety
- Top quality, high nitrile content mat for general use. Nitrile content lengthens life, reduces destructive effect of oils and greases.

Thickness	Colour	Sizes	Code
17mm	Black	1.5m x 0.9m	MZ3660BK

Bubble Mat

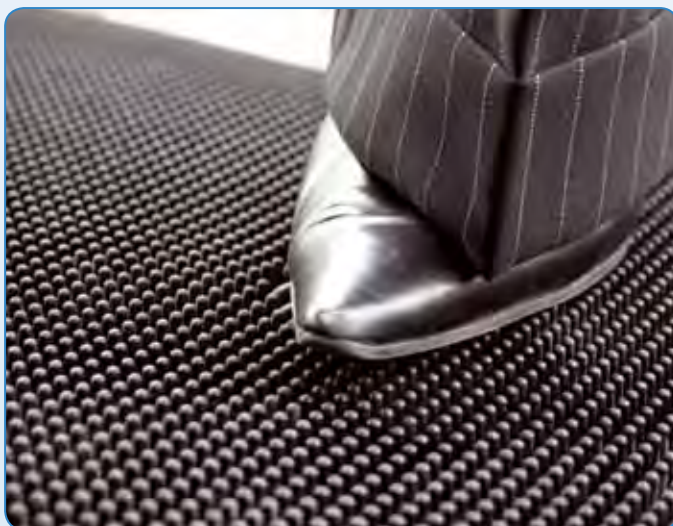

Where To Use
 Checkouts,
 Store Greeters, Reception
 Areas, Production
 Lines.

- Use in dry areas where there is long standing with limited foot and leg movement
- Standing on resilient rubber bubbles is like standing on air
- Offers excellent relief from foot fatigue by promoting circulation
- Choice of bevelled bright yellow edges or plain black edging for economy.

Thickness	Colour	Sizes	Code
14mm	Black with Yellow Border	0.6m x 0.9m	MX2436BK
		0.9m x 1.2m	MX3648BK
	Black with Black Border	0.6m x 0.9m	MX2436BP
		0.9m x 1.2m	MX3648BP

Custom made mats to any length as a rubber anti-fatigue runner.

Fingertip

Where To Use
 Schools from gravel or grass areas prior to entry. In farm locations to disinfect shoes. Industrial work stations as anti-fatigue mat.

As an entrance mat

- Flexible rubber fingers scrape off and trap dirt from shoes.

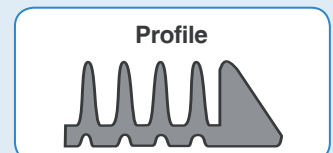

As an infection control mat

- Fill the mat with disinfectant to ensure soles of shoes walking over the mat are both disinfected and cleaned. Invaluable in rural/farm environments.

As an anti-fatigue mat

- Flexible rubber fingers provide good anti-fatigue qualities.

Thickness	Colour	Sizes	Code
16mm	Black	0.6m x 0.8m	MF2432BK
		0.9m x 1.8m	MF3672BK

What are Foam Laminates?

Foam Laminates are anti-fatigue mats consisting of several strata laminated together. Usually a tough vinyl top surface is laminated to a foam material. The top surface is designed to resist wear. The foam ensures anti-fatigue qualities.

A further, slip-resistant underlay is sometimes bonded to the underside of the foam thereby creating the ideal anti-fatigue mat – tough wear surface, air-soft, anti-fatigue foam and slip preventing under-surface.

XL Matting

... a cut above the rest

Where To Use

Production Areas,
Assembly Lines, Work Stations,
Checkouts, Bank Tellers.

- Soft yet resilient foam for superb anti-fatigue characteristics
- Exceptional slip resistance thanks to the clever serrated top surface pattern
- Available with yellow safety borders or in black only top surface
- Under-surface of foam resists mat movement to make the matting exceptionally stable in use.

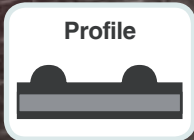

Profile

Thickness	Colour	Sizes	Code
13mm	Black with Yellow Edges	0.9m x 18.0m	PMTR360YW
	Black only	0.9m x 18.0m	PMTR360BK

Diamond Plate **Classic**

Where To Use

Production Areas, Assembly Lines, Work Stations, Checkouts, Bank Tellers.

- Tough, durable 4mm vinyl top surface with embossed diamond pattern for foot grip
- Top surface bonded to 12mm buoyant foam backing
- Built-in, bright yellow borders along both edges for safety
- Bevelled edge prevents trips
- Slip resistant underlay, bonded to under-surface to control mat movement is standard.

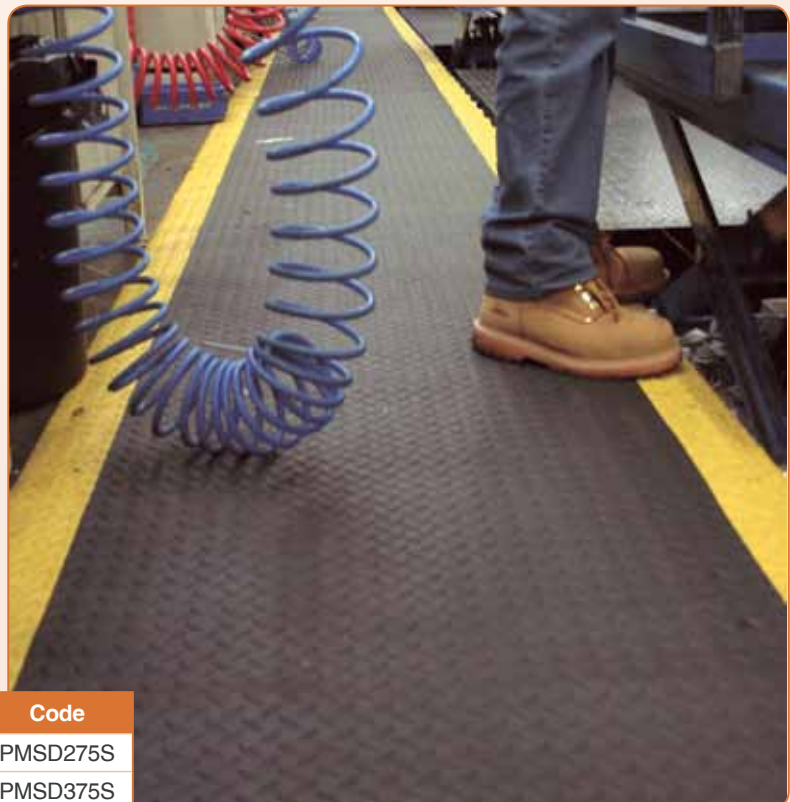

**Custom
made mats
to any
size**

Thickness	Colour	Sizes	Code
18mm	Black with Yellow Edges	0.6m x 0.9m	PMSD2436
		0.9m x 1.5m	PMSD3660
		0.9m x 6.0m	PMSD3200

Diamond Plate **Gel**

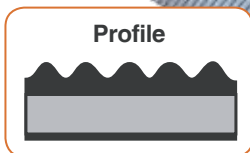

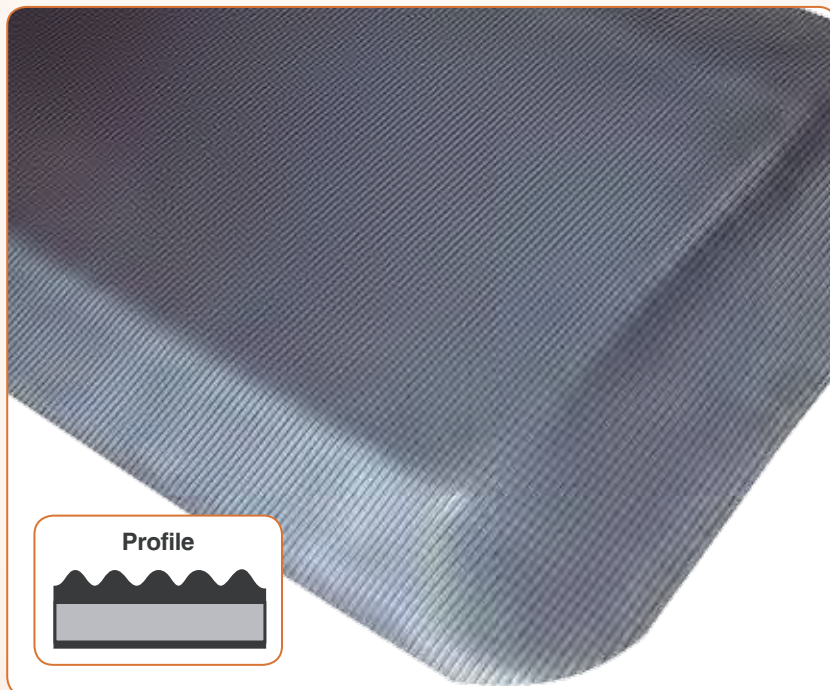

- An option with more resilient foam to produce a different anti-fatigue effect. This foam feels softer yet has a firmness creating good resilience and excellent fatigue fighting qualities.
- All the other characteristics of Diamond Plate Classic.

**Custom
made mats
to any
size**

Thickness	Colour	Sizes	Code
18mm	Black with Yellow Edges	Roll 0.6 x 22.8m	PMSD275S
		Roll 0.9 x 22.8m	PMSD375S

Comfy Rib

- Tough, 3mm, ribbed vinyl top surface for long life
- Add the bonded 12mm thick air-soft foam for exquisite foot comfort
- Very economical price
- The ribbed surface provides sure footing and is easy to clean
- Bevelled edges help prevent tripping.

Comfy Rib "Premier"

- All as with Comfy Rib but with slip resistant underlay bonded beneath the foam to control mat movement.

Thickness	Colour	Sizes	Code
15mm	Black	0.6m x 0.9m	PMCR2436
		0.9m x 1.2m	PMCR3648
		0.9m x 6.0m	PMCR3200

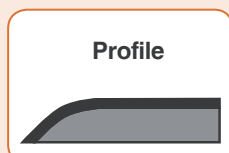

**Custom
made mats
to any
size**

Tile-Top

- Smooth, heavy-duty, vinyl tile top surface resists heels and sharp objects
- Very easy to clean
- Top surface bonded to 12mm thick air-soft vinyl foam.

Tile-Top "Premier"

- All as with Tile Top but with slip resistant underlay bonded beneath the foam to control mat movement.

**Custom
made mats
to any
size**

Thickness	Colour	Sizes	Code
15mm	Grey Speckle	0.6m x 0.9m	MO2436GY
		0.9m x 1.2m	MO3648GY
		0.9m x 6.0m	MO3200GY

Where To Use

Warehouse Picking Areas,
Laboratories, Nurse Stations,
Service Desks, Mailroom,
Dry Assembly Line,
Store Greeters.

Why Moulded Foam?

Moulded foam mats are made of expanded vinyl or other foam, giving superb, long life, anti-fatigue qualities. The top surface may have an integral pattern moulded into the foam, designed to enhance slip resistance and reduce wear of the top surface of the foam. Even safety yellow edges may be moulded into some of

the products. Being moulded and extruded as long runners, these mats are very economical. There is no additional lamination.

Diamond Foam

- Very economical expanded vinyl foam for excellent foot comfort
- Diamond pattern moulded into top surface to help prevent slips
- Yellow edges, full length of roll, are an integral part of the mat
- Bevelled edges to prevent trips – cut ends can be bevelled!
- Great insulator to protect from cold floors.

Custom made mats to any size

Thickness	Colour	Sizes	Code
10mm	Black with Yellow Edges	0.9 x 18.3m	MED360YW

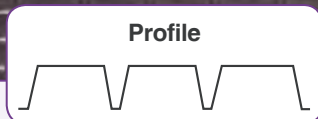

E-Z Step

- Closed cell vinyl – like standing on air
- Ribbed surface for surer footing
- Bevelled edges to minimise trips
- Thousands of mini-air bubbles insulate against cold floors like a wetsuit insulates in cold water
- Most economical of the moulded foams.

Custom made mats to any size

Thickness	Colour	Sizes	Code
9mm	Grey	0.427 x 0.737m	ME1729GY
		0.683 x 0.914m	ME2736GY
		0.9 x 18.3m	ME3600GY

S-Mat

Thickness	Colour	Sizes	Code
12.5mm	Blue, Black	Roll x 1m wide	PMSM67
		Roll x 0.72m wide	PMSM72

**Custom
made mats
to any
size**

Where To Use

Production and Assembly Lines,
in front of Machinery,
Printing Presses.

- Unique foam plastic composition for superb foot relief in industrial and commercial applications
- Oil and grease resistant. Opens up use in many environments that could degrade other foam products
- Perfect in wet areas due to excellent water runoff
- Specially designed 'S' pattern
- Can be supplied in runners or custom made to any width or length.

Soft Foot

Thickness	Colour	Sizes	Code
13mm	Grey	Rolls 0.9 x 18.3m	MES360GY

**Custom
made mats
to any
size**

Where To Use

Where long periods of standing cause foot, knee, leg or back ache. Dry Production Areas, Behind Reception Counters, Bank Tellers, Nurse Stations, Service Desks.

- Extremely comfortable standing surface
- Reduces fatigue by easing pressure to feet, legs, back
- Pebble, fused-on top surface provides increased resistance to wear plus added slip resistance in dry environments
- Lower density vinyl foam beneath the top surface gives underfoot cushioning
- Insulates by preventing cold from hard floors seeping upwards into feet.

Anti-fatigue Mats

Welded Strips are economically priced mats with plastic strips welded to each other at right angles producing a good draining mat with some anti-fatigue properties. The plastic strips vary in structure from product to product, offering choices.

Welded Strips

Where To Use

Where economy is a major factor in an anti-fatigue mat with good drainage

Vynalite Tube Mat

- Made from PVC tubes welded into a grid
- Lightweight and easy to roll up and move
- Energy absorbent. Helps prevent damage and breakage to dropped items
- Soft on feet in wet areas such as showers.

Other sizes available on request

Thickness	Colour	Sizes	Code
11.5mm	Black, Blue, Grey, Green, Red	10m x 0.914	PMTU09

WE'RE TROUBLESHOOTERS!

Many problems in a work or building environment can be solved with mats. But determining which mat to use to solve the problem needs expert knowledge. Wet, slippery entrances, hours of standing on hard, cold floors and preventing static shocks are but a few of the many problems that can be solved if the right mats are used. And that's where we come in. We are specialists in solving problems, where it is possible, by using the right mat in the right place. It

costs absolutely nothing for FREE advice from an expert Mat World consultant. Mat World is the mat division of Pall Mall Manufacturing Company whose 30 years of mat experience is available as is the wide range of Mat World mats exhibited in this catalogue. There are mat specialists ready to offer solutions at all of our branches in Sydney, Melbourne, Brisbane, Perth and Adelaide.

All it takes is a phone call: 1300 676 807

Vynagrip

- Open grid design of solid, square profile, PVC rods allows spills and debris to fall through
- Diamond-tread surface texture on top and bottom aids slip resistance
- Some chemical, oil and acid resistance.

Other sizes available on request

Thickness	Colour	Sizes	Code
11.5mm	Black, Blue, Grey, Green, Red	10m x 0.914	PMVG09

Heron Air

- Square profile PVC tubes welded to PVC under-bars aids anti-fatigue properties
- Open grid dissipates spillage
- Textured top surface to control slips
- Under-bars are textured to help control mat movement.

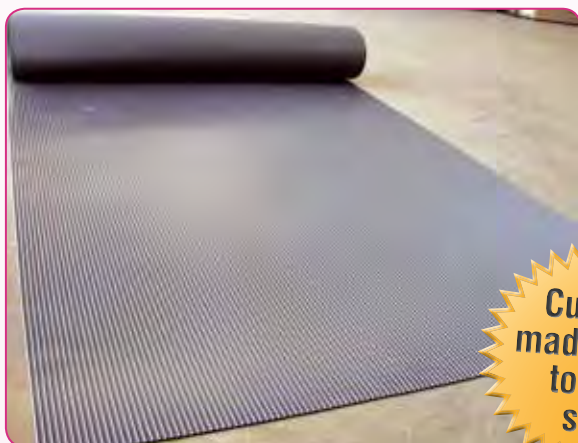

Other sizes available on request

Thickness	Colour	Sizes	Code
9.5mm	Black, Blue, Grey, Green, Red	10m x 0.914	PMHA09

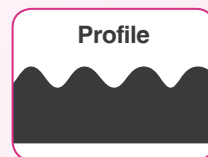

Protective Runners are all made of tough extruded vinyl, the differences, one from the other, being the weight and the thickness – and hence toughness – of the vinyl as well as the surface finish moulded into the vinyl. These runners are intended to protect the surface beneath.

Rib Mat Runner

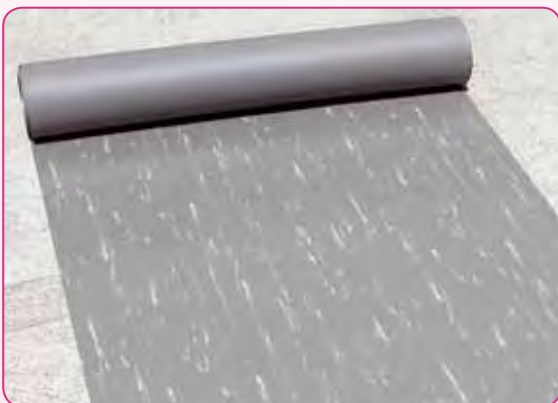

Custom made mats to any size

- Deep groove, rib patterned vinyl runner provides floor protection and sure footing at nominal cost
- Protects all floor surfaces including carpet to prevent wear resulting from constant traffic
- Corrugated texture makes for easy sweeping and mopping
- Can be cut to size with scissors, yet it is incredibly tough. Resists high heels and heavy trolley traffic.

Thickness	Colour	Sizes	Code
3.5mm	Black	0.9 x 32m	MR3105BK

Tile-Top Runner

Custom made mats to any size

- Tough vinyl runner
- Smooth surface for easier cleaning
- Excellent for outdoor use
- Can be seamed to make wider runner if required
- Smooth surface – easier for wheeled traffic e.g. trolleys or carts.

Thickness	Colour	Sizes	Code
2.5mm	Speckled Grey	0.9 x 18.3m	MTT360GY

Diamond Plate Runner

Custom made mats to any size

- Benefit of yellow safety edges
- Diamond pattern surface treatment gives slip resistant quality as well as resistance to wear.

Thickness	Colour	Sizes	Code
4mm	Black + Yellow Edges	0.9 x 22.8m	MM375UBK
		1.2 X 22.8m	MM475UBK

Special Purpose Mats

There are many uses for mats and there are numerous mats that have been designed for specific purposes. Clean rooms, for instance, need special treatment for the finest particles of dust and dirt prior to entering the area. Pools and showers are wet areas where mats need to drain

well but also be soft on bare feet. Supermarkets need extra protection from slip falls in fruit and vegetable areas. There are anti-fatigue mats that need to be resistant to welding sparks, mats that must insulate against electrical shock and many other different, special purposes.

Static Dissipating Mat - StatKing

Where To Use

Computers, Atms, Service Counters, Electrical Industry Work Areas, Registration Desks.

- Special grounding cord clips to mat and is attached to earth such as earthed office skirting. This allows static electricity built up in the body to discharge harmlessly through the mat and to earth.
- Helps avoid damage to sensitive equipment
- Also has excellent anti-fatigue qualities.

Custom made mats to any size

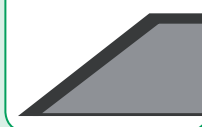

Resistivity	Colour	Sizes	Code
10 ⁹ Ohms	Grey	0.6 x 0.9m	PMCS243
		0.9 X 1.5m	PMCS366

Custom mats made to size available with cord connection every 2m length

Welding Mat - SparkSafe

Profile

Where To Use

Industrial Work And Welding Areas, Metal Work Grinding, Machine Shops

- Repels sparks and hot metal shards
- Excellent anti-fatigue mat thanks to the thick foam base
- Textured rubber top surface improves traction in wet or dry conditions.

Custom made mats to any size

Thickness	Colour	Sizes	Code
10mm	Black	0.9 x 18.3m	MSP360BKP

**Electrical,
Static, Heat**

Non-Conductive Insulating Corrugated Switchboard Mat

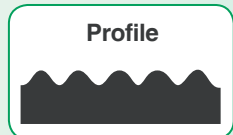

- Rubber matting insulates against electrical shock
- Complies with AS/NZS 2978-1995 and ASTM D 178-01-2005
- Dielectric Rating 30,000 Volts
- Proof tested 20,000 Volts
- Recommended usage 17,000 Volts

Where To Use

Near fuse boxes, at Control Panels, in front of Switchboards, at High Voltage Electrical Equipment.

Custom made mats to any size

Thickness	Colour	Sizes	Code
6.5mm	Black	0.9 x 10.0m	MSR310BK

Cord Cover – Carpet

- Protects electrical and data cables where they run across carpet. It has the additional and very important benefit of preventing trips and stumbles
- Cord Cover consists of a tough flexible vinyl strip with carpet gripping velcro along both sides.

Sizes	Code
1m x 100mm	PMCC01BK
10m x 100mm	PMCC10BK
30m x 100mm	PMCC30BK

Custom made mats to any size

Where To Use

To protect electrical and data cables on **soft floors** and reduce a trip hazard.

Cord Cover – Hard Floors

- 1m long hard rubber sections that interlock to make a cord cover as long as required
- Bevelled to reduce trip hazards and allow light wheeled traffic to pass over
- Capable of taking multiple electric and data cables simultaneously.

Sizes	Code
1m x 140mm wide	PMCCRU01

Where To Use

To protect electrical and data cables on **hard floors** and reduce a trip hazard.

Wet Area Matting

Matting for wet areas has its own special requirements. Obviously, the need for water to run off or drain through the matting is most important. Essentially the water deposited on the mat should quickly and automatically run off the top surface of the mat leaving, at all times, the top surface dry or, at worst, damp. The mat must be of such a structure that it

is gentle to bare feet and pleasant to walk on. Many mats that may drain well are not necessarily kind to bare feet.

Slipping, too, is a possible problem in wet areas – which is a good reason for the top surface to drain well. Slipping in wet areas is generally a far greater hazard than in dry areas.

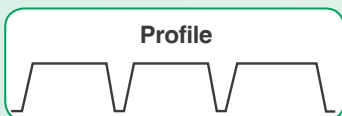

Wet Area Matting – S-Mat

- Unique foam plastic composition, gentle to bare feet
- Excellent water run-off thanks to the clever S-pattern design
- Resists slips due to constant water run-off plus the give of the foam plastic
- Able to be custom made to any practicable length and width or available in runners to any length.

Custom made mats to any size

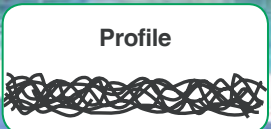

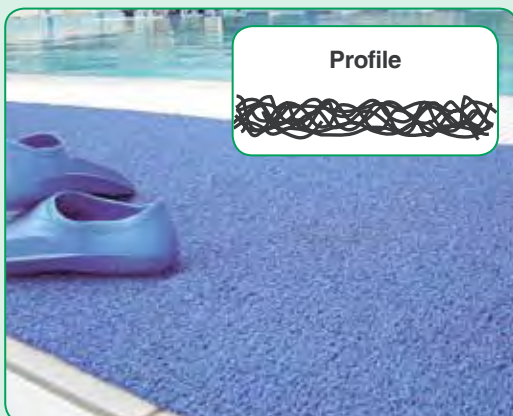

Where To Use
Swimming Pool Surrounds, Aquatic Centres, in Showers, at Baths, in Locker Rooms.

Thickness	Colour	Sizes	Code
12.5mm	Blue, Black	Roll x 1m wide	PMSM67
		Roll x 0.72m wide	PMSM72

Wet Area Matting – Wayfarer Unbacked

Where To Use
Around Swimming Pools, Showers, Locker Rooms, at Baths.

- Open-back vinyl loop construction lets dirt and water pass through, mat surface stays clean and dry.
- Anti-bacterial agent resists mildew in high moisture areas.
- Easy to clean – shake out or hose off and allow to air dry.
- Comfortable cushion surface is ideal for recessed mat.

Thickness	Colour	Sizes	Code
8mm	Blue, Grey	0.9 x 1.5m	MW366U
		0.9 X 12.0m	MW403U

Custom made mats to any size

Sterile, Dust-free Areas

Where To Use

Outside sterile areas – operating theatres, cleanrooms, electronic function or processing areas, entrances from workshop to office area.

Cleanstep

- Disposable dirt stopper. Unique layered pad has non-transferring adhesive to remove dust and dirt from shoes and wheels
- As soon as one layer is dirt loaded, tear off and expose a fresh layer.
- Total of 60 layers per refill pack
- Non-skid frame holds refill pack.

Colour	Style	Sizes	Code
Grey	Frame with refill	0.800 x 0.650m	MN6032EG
	Refill only	0.750 x 0.600m	MN4030XG

Colour	Style	Sizes	Code
Grey	Frame with refill	1.220 X 0.650m	MN1260EG
	Refill only	1.200 X 0.600m	MN1260XG

Chairmats

Profile with spike anchors

Under-desk Mats

- Prevents carpet wear from chair castors and feet
- Allows chair to move freely
- Spike anchors under the mat hold the mat in position on carpeted surfaces
- Also available without spike anchors for hardfloor protection
- Bevelled edges for safety.

Thickness	Colour	Sizes	Code
3.5mm	Translucent	0.9 x 1.2m with spikes	MA3648WS
		1.1 x 1.3m with spikes	MA4553WS
		0.9 x 1.2m no spikes	MA3648NS
		1.1 x 1.3m no spikes	MA4553NS
		Roll: 1.2 x 10m with spikes	MA1210WS

Roll can be custom cut to length

Mat World logo mats are available in a variety of styles using varying processes. To determine which is most suitable to your needs, speak to a Mat World consultant. There is no obligation in such a consultation – only a desire by Mat World to ensure that your needs are fully satisfied.

- Choice of plush pile mats, bi-level high traffic entrance mats or Wayfarer “spaghetti” mats
- Logos can be by screening, laser-cut insertion or dyeing
- Logo mats can be made in standard sizes or custom sizes
- Quantities from one to any number can be made but quantities have an effect on price as with any imprint process.

Knee Ease

Thickness	Colour	Sizes	Code
15mm	Black	0.375m x 0.500m	PMKM3750

Kneeling Mats

Where To Use

Electricians, Carpet Layers, Plumbers, Gardeners, anyone who kneels.

- High density, closed cell foam relieves the pressure of hard or rough floors on knees
- Portable – lightweight and has a hand-carrying grip
- Perfect OH&S accessory. Relieves knee pain and back stress.

Fruit & Vegetable Mats

Where To Use

Supermarket Fruit And Veg Displays, Produce Stores.

Scraper

- Vinyl loop-pile carpeting bonded to slip-resistant, stain-resistant vinyl base
- Loop-textured vinyl carpeting grabs dirt and grit from shoes
- Comes clean with shake-out or hosing
- Controls 'lettuce creep'. Helps prevent leaf vegetables and berries creeping off the mat, onto floor and creating a slip hazard.

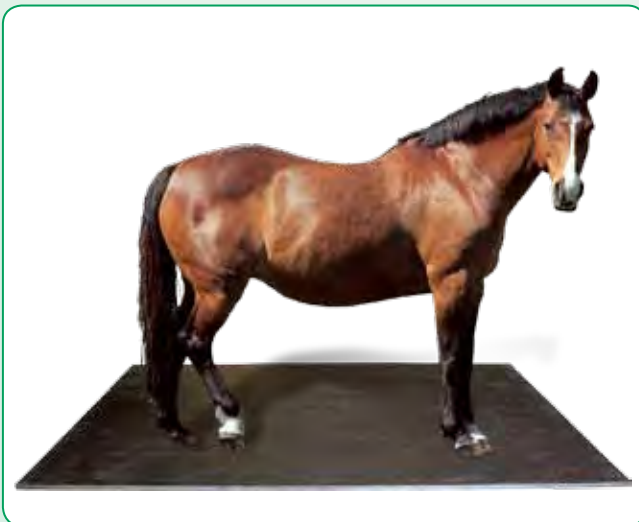

Thickness	Colour	Sizes	Code
8mm	Forest Green	1.5m x 0.9m	MS3660

Heavy Duty Rubber Mats

Where To Use

Heavier Than Normal Load – Stables, Gym Equipment, Airport Luggage Areas

Stable & Cattle Mats

- Special heavy duty rubber takes heavier loads
- Ideal stable mat
- Reduces animal fatigue – increases productivity
- Anti-slip surface gives animals traction
- Insulates cold floors
- Designed to drain easily, clean easily
- Hygiene – high density rubber controls bacterial growth.

Thickness	Colour	Sizes	Code
18mm	Black	1.2m x 1.8m	MK4872BK

Can't find what you need?

There are numerous situations, environments and facilities which, from time to time, have a special need for a special mat. These special needs may not be specifically covered by the items in this catalogue. That does not, by any means, suggest that those special needs could not be met. **Speak to us and discuss those needs and let us see whether we can find an answer for you.** Generally we do. In addition, the fact that we have the facility and the know-how to make and adapt mats means that we can and do solve such problems – regularly.

The Care, Cleaning and Maintenance of Mats

Mats supplied by this company are all made by reputable companies using first-class materials. Among the many features of these mats is their slip-resistance. However, great care needs to be taken both in the placement of these mats and the care of the mats and the floor itself to ensure that the mats are used in circumstances which will not allow the mats or the users of the mats to slip.

While these mats are, in themselves, not conducive to slipping, floors that are naturally slippery or floors that become slippery due to maintenance methods employed or floors that are slippery due to substances deposited on them can cause potential danger from slipping.

It is essential that floors and the mat itself be kept scrupulously free from all extraneous matter. This includes cleaning solutions themselves.

Carpet Faced Entrance Mats

Except for those edges over which it is not possible to walk such as an edge hard up against a wall or except where a mat is to be placed in a recess, all mats should be edged with specially moulded edging. Such edging should be maintained in good condition and repaired or replaced if damaged. Be careful when polishing floors around a mat that the pad or brush does not contact the edge. It is better in such a case, to remove the mat during polishing.

The floor beneath the mat must be clean and free from grit, sand or dirt. If placed on a shiny, slippery floor the mat may need to be secured. On some carpet surfaces the mat may move and should therefore be secured. Various devices are available for this purpose.

Vacuum or sweep the carpet face daily. The mat should be dry and all dirt, grit or sand must be removed. Oily dirt can be removed by washing with a neutral, water-based detergent with warm water. Preferably spray onto the carpet face, agitate with a broom or soft brush. Rinse with clean water ensuring

all detergent and emulsified dirt is removed. This may require more than one rinsing. Do NOT use solvent cleaners, highly alkaline cleaners, hot water, or rotary scrubbers.

Hot water extraction or carpet bonnets may be used as they would on carpets. Follow manufacturer's instructions.

Allow to dry before putting the mat back into service. Avoid banging the mat edging or standing the mat on end while storing or drying. Lay flat to dry. The dry mat may be rolled but not folded.

Rubber and Plastic Mats

Mats should always be placed on a spotlessly clean floor, free of dirt, sand, grit, oil, fat or detergent or floor cleaner residue.

Solid surface mats, used in dry areas, should be cleaned regularly with a neutral or slightly alkaline (up to pH9) detergent containing NO solvents. Rinse thoroughly to remove all traces of detergent. Allow to dry.

Drainage surfaces with moulded-in holes should also be cleaned as above. They should also be thoroughly cleaned beneath the mat in a similar manner. Allow to dry before placing back in service, keeping the mat flat.

It is essential to clean the floor beneath the mat as well as the mat. In the presence of any oils or fats or greases (e.g. kitchens or machine shops) the floor must be scrupulously cleaned with a suitable floor cleaning detergent. However, as such a detergent may be strongly alkaline and may contain solvents, avoid using such a detergent on the mat itself.

Once the floor is thoroughly cleaned, rinse several times with clean water to ensure all detergent residue is completely removed. If this is not done, any liquid passing through the drainage holes may reactivate the detergent and result in a moving or slipping mat.

If unsure of mat maintenance methods – please contact one of our offices.

All advice is offered as suggestions only. It is not possible to anticipate or describe the relationship of all mats to all conditions. Consequently this advice should not be considered definitive. Mat World does not accept responsibility for the consequences of any mat maintenance used.

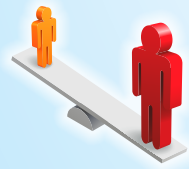

All mats are covered* by  free refund or replacement warranty.

Save **\$\$\$!** It costs less to buy from  and we deliver free in most metro areas*.

Free advice. Tell us your problems. Let our troubleshooter advisors help you solve them.

You don't have to be a giant buyer. One mat or one hundred. We value every order. And we can supply from any of our warehouses in Sydney, Melbourne, Brisbane, Perth or Adelaide.

*CONDITIONS APPLY

Anything is Possible

Whether you need a small mat for your front door or a giant mat for the entrance to a shopping centre; whether an anti-fatigue mat for a single workstation or a 50 metre long production line, Mat World, Australia's major mat specialist, can usually provide it.

Try us and see for yourself.

MAT WORLD WARRANTY

All mats supplied by Mat World are warranted by the manufacturers to be free of any manufacturing defects.

Except if made-to-measure, any mat which is not to your satisfaction or is in any way defective should be returned in its original packing within 30 days for a full refund or replacement (excluding delivery).

Prior to return, phone for a *Return Authorisation Number* and instructions.

No returned goods will be accepted without a Return Authorisation Number.

Made-to-measure mat return accepted only for manufacturing defects.
