

Bespoke Picture Framing is the best route to take if you're after the perfect match for your style and interior.

Whether you are framing a new piece of art or making over an old favourite, bespoke picture framing can not only enhance the work itself but breathe new life into the room in which they will hang...

It's sensible to create a spending budget including all pictures that require framing in the room.

So how do we do this if the cost of bespoke framing varies so much?

Well, here's the solution, to help you gain an understanding we've made a rough guide of what costs you can expect to pay for a good quality service.

The most important part of ordering anything bespoke is to make sure you get it exactly to your specific requirements. Colours, Tones, Mounts, Mouldings and Slips to match the picture and desired location.

Glass type is an important decision depending on the item being framed - Reflection Control Glass, U.V Protected, Diffused or a Standard Clear also Perspex and Acrylic Plexiglas options?

Consultation is Key - *When it comes to choosing the best combination we find working together in a team leads to the most successful result so bring your partner, husband, wife or close friend along to help bounce ideas to and fro...Your experienced framer will always guide you but ultimately the decision will be yours.*

Once a decision has been made, the framing team will process and order in materials. Frames come in lengths and are then cut to size and mitered at the corners for an almost seamless fit. Mounts are often hand cut as is glass. The whole piece is then assembled taking great care and attention to detail.

Paul consulting at our Daventry Showroom
