

01.40.01 ibs offshore + exploration equipment protection

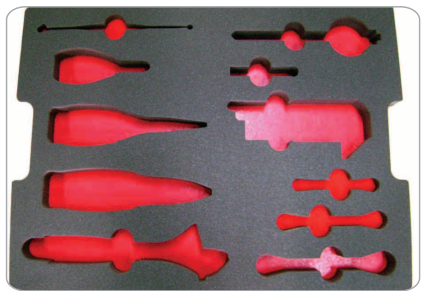

Since 2003 from our manufacturing facilities in Dubai (UAE) and Lagos (Nigeria) IBS Flightcases have provided bespoke and off-the-shelf hard case and crate equipment protection as well as foam engineering services for the offshore and exploration industry.

From the design and CNC manufacture of specialist flight and transit cases to bespoke foam engineered inserts and gaskets through flat-packing re-usable plywood and timber export crates IBS offer a complete protection solution for all fragile, valuable and sensitive equipment. Our local workshops expedite case and foam solutions custom built to your requirements with lead times from as low as a few hours, in-house manufactured output includes:

- IBS Flightcases - The ultimate in re-usable touring hard shell protection
- KatKrate - Flat-packing re-usable plywood and timber export crates
- Ramfoam - Specialist foam sheet products for protection, thermal and sound insulation and sealing
- IBSfoam - Tool and Equipment Management foam CNC engineered inserts for tool drawers and tool boxes
- KatRak - Portable and fixed Network and Server 19" Racks for communications and IT rooms

In addition to our own IBS manufactured products we also act as sales agents and stockists for waterproof Milspec accredited cases and hardware from the worlds leading manufacturers within all of which IBS offer internal foam customisation to secure and protect your equipment:

- HPRC Cases (Italy)
- Amazon Cases (UK)
- Pelican Cases (USA)
- SKB Cases (USA)
- Zarges Containers (Germany)
- CP Cases (UK)
- Penn Elcom (UK)

The vital constituent of protective packaging and gasketing is the selection of appropriate foam types and densities, this is critical in ensuring the safety and longevity of any protection or seal. IBS Flightcases are Zotefoam and Ramfoam accredited distributors and stockists for the Gulf region so you have access to the worlds best performing foam and rubber products right on your doorstep. Our capabilities extend to design, develop and engineering the most effective foam solution for any application utilising CAD/CAM processes such as:

- Punching
- Stamping
- CNC spindle routing
- CNC laser cutting
- Waterjetting
- Hand forming and sculpting.

When protection for your valuable equipment is required within a case our many years of experience are brought to bear when advising customers on equipment support, layout and requisite attenuation against shock, impact and vibration. Whatever your foam packaging requirement - be it military specification, commercial protection for an industrial product, or an enhancement to your sales presentation or a gasket or filler we can offer choices in colour, multiple laminations and foam materials, including those with anti-static, conductive and self-extinguishing properties.

The Gulf's leading offshore companies recognise the benefits of a rolling together consolidation of case and foam protection products to the regions leading supplier of equipment protection - IBS Flightcases.
