Unexpected Furniture

Sqill

Sqill by Clay Designs is a stunning light sculpture that functions as a table and an area's statement ambient lighting.

Sqill

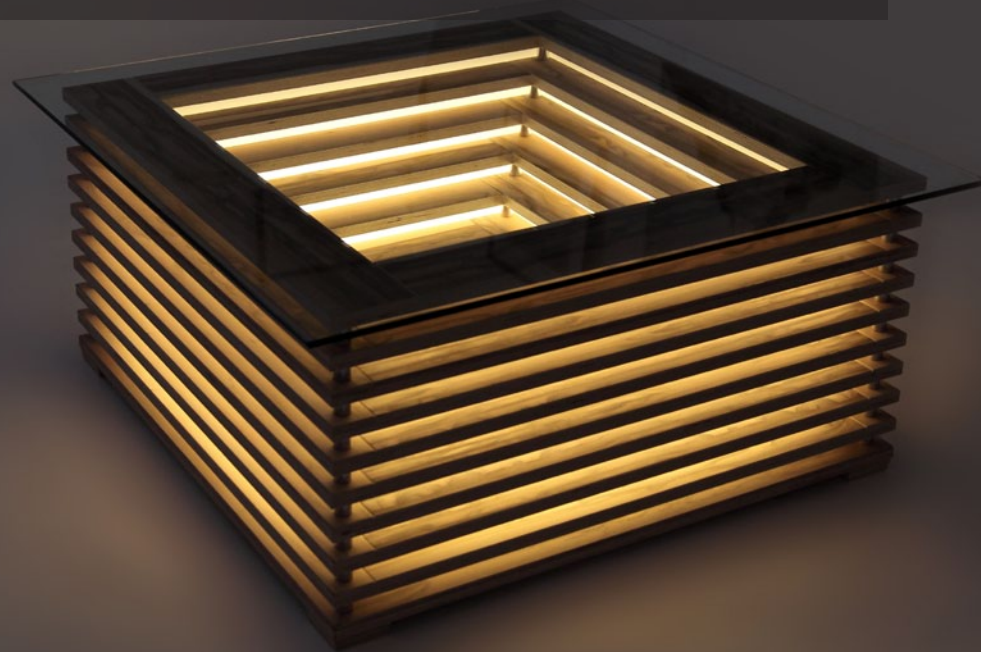

Enriching any room
Sqill elicits admiration

With the illumination turned off, Sqill stands alone beautifully, emphasising the quality and distributing elegant shadows. Immediately on awakening, the beautiful layers filter an even glow creating an atmosphere perfect for any occasion.

Rechargeable, sustainably designed and
exclusively hand made in the UK

Sqill mesmerises the senses, projecting a pool of light in which to submerge and bathe, creating a sensuous cable free lighting experience from an exclusive new perspective.

Sqill-customised

We can tailor Sqill to your exact specification.

Available in a range of real wood veneer or solid timber finishes at 900 x 900 x 408mm.

Sqill also has the flexibility for the design to be creatively modified to customer's exact specifications to compliment individual interiors and styles.

"Sqill really gets my guests talking"

says James Gold, who had been searching for almost a year to complete his showcase Georgian town house renovation, with the perfect centrepiece table to fit his stylish living room.

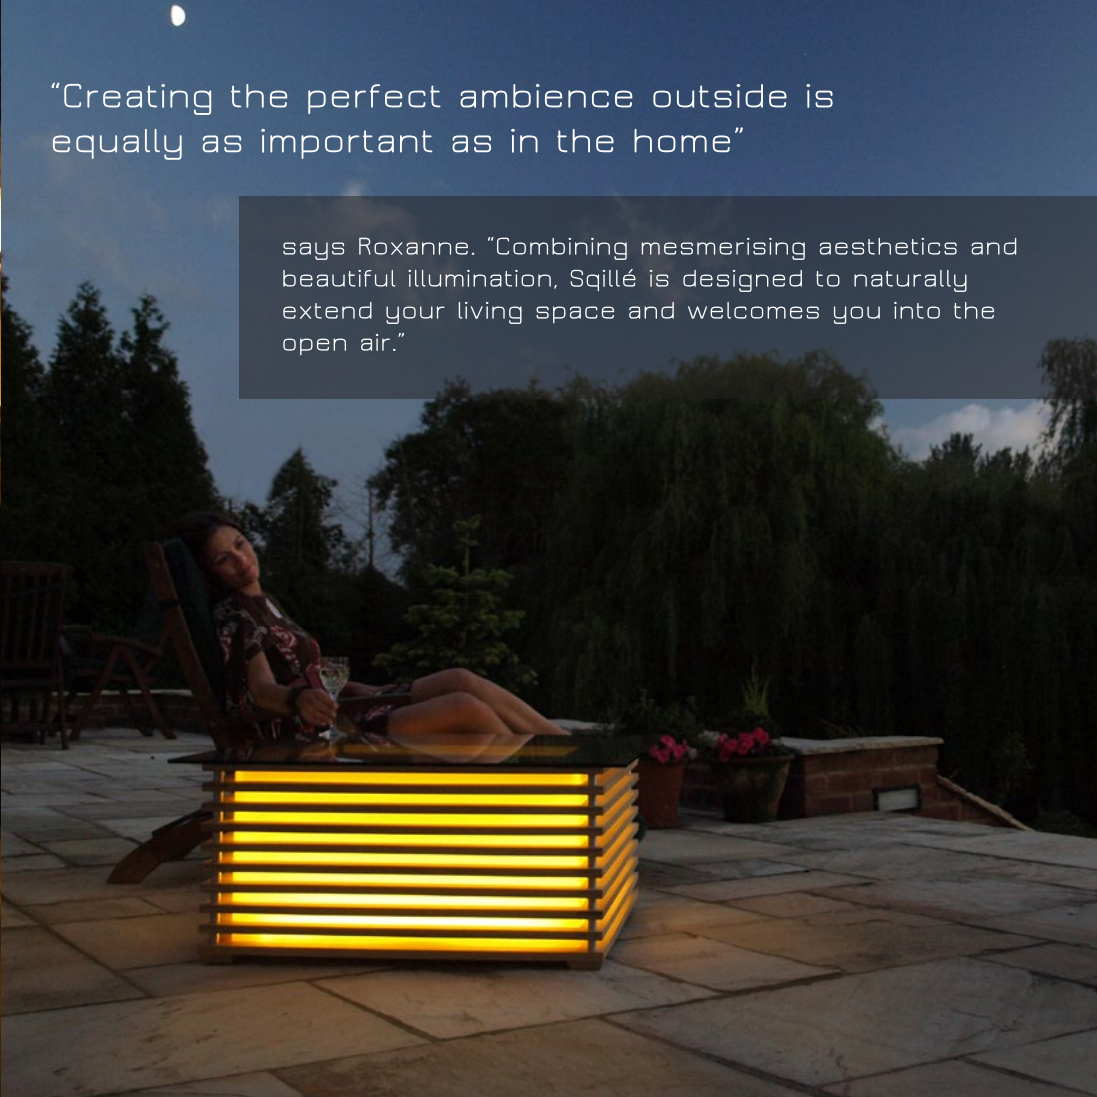

A glowing Sqillé light fixture, a square table with horizontal slats, sits on a stone patio at night. The light fixture is illuminated from within, casting a warm yellow glow. In the background, a brick building with large windows is visible, and a spherical light fixture hangs from the ceiling.

The luminary freedom of Sqill has been expanded...

Introducing Sqillé

Following the highly acclaimed and successful launch of Sqill, it soon became clear there was another place for Sqill to shine. The recurring question; "Can it go outside?" spurred us into the development and realisation of Sqillé.

A woman is sitting on a Sqillé light fixture, which is a square table with horizontal slats, on a stone patio at night. She is holding a glass and looking towards the camera. The light fixture is illuminated from within, casting a warm yellow glow. In the background, there are trees and a brick building.

"Creating the perfect ambience outside is equally as important as in the home"

says Roxanne. "Combining mesmerising aesthetics and beautiful illumination, Sqillé is designed to naturally extend your living space and welcomes you into the open air."

Combining design, craft and technology, seamlessly

Utilising traditional based techniques with cutting edge technology, Clay Designs adhere to sustainability and exceptional quality. Making sure each layer is positioned to accentuate the natural flowing pattern illustrates the attention to detail in each table.

Clay Designs are leading the way in dynamic fusions of furniture and light.

With a 7 hour or overnight charge, Sqill will illuminate your life for around 15 hours with no unsightly cables. At the push of a button Sqill's ambience fills your soul with an enigmatic central glow we have all been subconsciously desiring.

We met and got together 9 years ago and our baby is Clay Designs. When Clay is not demanding our full attention we like to eat good food, mostly made by our fair hands and find great wines, which are possibly consumed a little too easily, especially in the company of friends.

Clay Designs is the creation of David Chapman and Roxanne Needham. David is the Right Brain and Roxanne is the Left, together they make an impressive team, bringing you creativity, desire and satisfaction.

Our adventurous sides like nothing more than taking a ride out on our motorbikes, albeit only in fair weather or snowboarding down crisp white mountains. The pleasure and enjoyment in nurturing Clay though, is one which allows us to create the unexpected and experience the pride of producing respected and unique designs for the delight of others.
