## Manual Intensive Courses

The type of intensive course will depend on your experience as a driver. If a total beginner, try our Introductory Lesson (2 hours during which you will learn the controls of the car as well as drive the vehicle). This assessment is needed to identify the length of intensive course required, i.e. 3-day, 5-day, 8-day, 10-day. The number of hours per day you will need depends on the number of lessons required to reach above test standard. A total beginner would probably require a number of lessons as a guideline; this would be double their age. But the more hours you put in the greater chance of you passing first time. Intensive courses are normally four hours or six hours per day, for instance split into sessions of two hours with a half hour break in between. Each intensive course will be tailored to the individual's needs. You should only book a driving test with the agreement of the instructor, to avoid clashing with other pupils' tests. Towards the end of your intensive course, if you have completed the theory test, consult your instructor. Remember you must have passed the theory test before booking a practical driving test and can, if you wish, take the intensive driving course before the theory test and then book the practical test.

I can also put you in touch with a company that can fast track a test for you if you need it urgently or a test is too far ahead.

Below are the details of each course available depending on which one of them you require.

## **Eco Safe Driving**

Eco Safe driving is now essential for the future of our planet, and more motorists are becoming aware that changes in the way you drive can make a difference to both the environment and to your motoring expenses. You don't need to be a learner to learn Eco Driving.

**Here are some of the benefits of eco safe driving:**

**Less wear and tear on the car**

**You can reduce fuel emissions**

**A smoother drive which helps with traffic flow and alleviates stress.**

**You can reduce servicing costs.**

Eco safe driving has recently been incorporated into the driving test, and examiners make an eco-driving assessment of learner driving.

I will incorporate the latest driving techniques and will provide you with a range of in valuable tips. Here are just a few of my tips

- Drive smoothly and avoid acceleration and heavy braking.
- Keep your eyes on the road ahead to avoid stopping unnecessarily.
- Minimise number of gear changes, use highest gear available.
