- 4 x pairs PVC Gloves
- 30 x Disposal Bags
- 30 x Bag Ties
- 1 x Instructions & Contents
- 4 x Bunker containers

Under the 1990 Oil Pollution Act (USA), oil tankers greater than 122 metres (400 feet) must have a spill kit on board to handle a 12 Barrel (1900 litres) oil spill.

The 1900 litre kit is contained in four 500 litre containers to enable easy storage and to maximise your ability to put these kits in strategic places on board. By having them in multiple containers you should have 1 kit nearby at all times and be able to move the remaining units quickly and easily to the source of the spill.

The containers are lockable and weatherproof and the absorbent contents are evenly distributed across the 4 lockers which are easily moved by pallet truck or forklift..
