Although diamond is expensive, it delivers superior results compared to carbide by cutting quicker and easier through very hard material such as large format porcelain tiles, marble, travertine, solid granite worktops as well as softer material such as ceramic tile, glass, fiberglass, mirror, pottery and more. Perhaps you are involved in a commercial project such as an airport, hotel, restaurant or retail outlet, or installing a domestic bathroom or kitchen. Our tile drills are the ideal solution for cutting all stone including the hardest known porcelain tiles.
