

Space Adventure Workshops & Assemblies

SpaceTime's Space Adventure Workshops and Assembly Programs are activity-based learning adventures that get kids energized and excited about science and space exploration through three different program formats - classroom workshops, large group assembly programs and our new small group assembly programs.

The **classroom workshop format** is designed for small groups of children and provides an integrated, interactive experience where each child participates in all of the hands-on activities and experiments. The **large group assembly format** utilizes the same themed curriculum as the classroom workshops but is designed for large audiences and is presented as a "space science show" where the children participate in the activities and experiments on a volunteer basis. Our **small group assembly format** is a hybrid of these two formats with activities and experiments designed for large classroom sized groups.

The curriculums - or "themes" as we call them - that are presented through these formats have all been designed utilizing our "Five-E's" inquiry-based learning strategy. This strategy, along with our trademark "Focus on Fun" presentation methodology make our programs learning adventures that are truly OUT OF THIS WORLD!

Here are some of the workshop themes that SpaceTime offers

Rockin' Rockets

Take a ride into the exciting science of space exploration where kids get to do just about everything there is to do with rockets short of riding one into space.

Interstellar Adventure

Take a journey beyond the edges of our Solar System to explore the many mysteries of deep space including exoplanets, hypernovae, black holes and more.

Mars Explorers

Explore the mysteries of the red planet and the awesome challenge of mounting a manned, 60-million mile mission to its surface.

Starry Night

Get familiar with the night sky by learning just what those little points of light really are and what it takes to get to know them (a great tie-in with star parties).

Metrics

- Availability: 8:00 - 6:00, Monday thru Friday; 10:00 - 6:00 on Saturday (excluding major holidays)
- Grades: K-1, 2-3, 4-5, 6-8 (custom ranges also available)
- # of Children: Classroom Workshops: Min - 6, max - 16
- Small Group Assemblies: Min - 17, max - 40
- Large Group Assemblies: Min - 41, max - unlimited
- Program length: Most programs are available in 30, 45, 60, 75 & 90 minute versions

Pricing (exact pricing varies depending on the length and theme selected)

- Classroom Workshops: From \$119.00 to \$249.00 per workshop
- Small Group Assemblies: From \$129.00 to \$259.00 per assembly
- Large Group Assemblies: From \$159.00 to \$289.00 per assembly
- Discounts available for multiple consecutive programs
