

Space Adventure After School Enrichment Programs

I Want to Be an Astronaut

With I Want to be an Astronaut kids get to see and feel what it is like to train for launching into space and exploring the planets, moons, comets & asteroids of our Solar System. They will learn about the programs and facilities that NASA uses to get astronauts ready for space travel, design their own space missions including their space suits, rockets & destinations, try out their planet walking skills in our Micro Gravity Boots, experience a simulated rocket launch and more. (Grades K - 6th, may group up to 4 grades max)

Alien Adventures

Is there alien life beyond Earth? With Alien Adventures kids will go on a virtual space mission to explore the possibilities of life on other worlds. They will get to go up close and personal with worlds in our Solar System where scientists believe alien life might exist as well as take an interstellar ride to a distant planet that could harbor extra-terrestrial life. In the meantime they will have a STELLAR TIME making their very own Space Slime, launching their own Galactic Gliders, searching for aliens in the classroom and more. (Grades 1st - 6th, may group up to 4 grades max)

Sailing the Solar System

Set sail on an amazing journey through our cosmic neighborhood with Sailing the Solar System. This theme will take kids on a hands-on & minds-on adventure through the Solar System where they will get to explore Kuiper Belt, search the clouds of Venus for signs of life, build their very own SpaceTime Solar Sailers, pilot a remote controlled planetary rover, explore the lakes of Titan and much, much more. (Grades K - 6th, may group up to 4 grades max)

Rockin' Rockets

With SpaceTime's Rockin' Rockets program kids will get to do just about everything there is to do with rockets...short of riding one into space! This program takes them on a wild ride into the fascinating science of rocketry and space exploration while letting them go hands-on to build and launch safe, non-combustible rockets. Activities include learning about the science of rocketry, crafting their own SpaceTime Cosmic Cruisers, and **building & launching lots of different kinds of rockets.**

(Grades K - 6th, may group up to 5 grades max)

Metrics

- Availability: 8:00 am - 6:00 pm, Monday through Friday (excluding major holidays)
- Grades: K-1, 2-3, 4-6 (custom groupings also available)
- # of Children: Minimum per class is 9, maximum per class is 18
- Class length: Classes are available in 45, 60, and 75 minute versions
- Program length: Programs are available in 5 to 10 class courses and can take place once or twice per week

Course pricing*

- 45-minute classes: \$10.50/child/class
 - 60-minute classes: \$11.50/child/class
 - 75-minute classes: \$12.50/child/class
- Example: A 6-class course of 45-minute classes would cost \$63.00 per child

*Note: Pricing may vary depending on district and/or school administration & facilities fees. Custom group pricing options also available.
