

Aluminum Foil Tubeformer

Special designed molds

7 (4) corrugation on request

Aluminum tube is widely used in the kitchen, bathroom, air condition venting and HVAC system. The corrugated aluminum tube can easily compressed and strached, and the aluminum corrugated tube can change its shape and keep it. The Auto cutting system is the most effecient.

Technical Data

Model	ACT-1A
Tube Diameter	75-600mm(3"~24")
Aluminum Foil Thickness	0.06~0.15mm
Strip Width	35~50mm
Feeding Speed	45m/min
Main Power	1.5KW
Dimension	1200x550x1200mm
Weight	300Kg
