or on A4 (front / rear), scaling the page (booklet printing).

SLIDE®

## SLIDE

**SLIDE** is a thoroughbred Italian entity founded in 2002 that benefits from the 30-year-long know-how of Giò Colonna Romano in manufacturing plastic resins: from the first experiences acquired through house-ware and gardening sectors, followed by the innovative luminous and coloured furniture with a distinct and ironic design from the SLIDE collection. With registered headquarters and production premises in Buccinasco (Milan), today it employs over 100 people and sees a constant increase in revenue thanks to its strong drive towards export, now representing 80% of total sales reaching over 120 different countries.

The SLIDE products are realised in polyethylene by rotational moulding technique characterised by an exceptional use of light, ideal for furnishing outdoor, indoor and scenographic events.

With the latest introduction to the *new polyurethane productive technologies*, SLIDE has created a new range of products presented at the last Salone del Mobile, an evolution dictated by the market demands and by the desire of the company to make its offer more comprehensive and competitive.

As an extension of the SLIDE brand and as a vertical integration of its services, **SLIDE Events** was founded in 2007, specialised in all-round planning services for private and corporate events: such as preparing 3D rendering for the conception and definition of the final furnishing, transport, hire and assembly of the products.

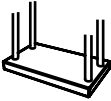

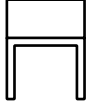

In 2011, the prestigious project **SLIDEart** was launched at the "Sign Off Design" exhibition, during the 54th Biennale d'Arte di Venezia: the aspiration attempts to find a new dialogue between design and contemporary art, through unique artworks by internationally acclaimed artists and designers.

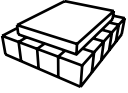

## THE PRODUCTS

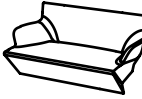

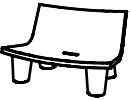

The SLIDE production includes seats, tables, lamps, pots and design complements for outdoor and indoor use. The products often spring from collaborations with internationally acclaimed designers, such as Karim Rashid, Marcel Wanders, Paola Navone, Marc Sadler, Alessandro Mendini, Stefano Giovannoni and Denis Santachiara, responding to the desire to create a quality product and to position SLIDE in a the medium to top market segment. The SLIDE products are made with *100% recyclable polyethylene* by rotational moulding technique, with the additional option of choosing a shiny finish through the process of lacquering: a valuable technique to reclaim merchandise with downgraded material turning it into luxury and fine furniture. With the introduction of polyurethane injection moulding technique, SLIDE has now the ability to diversify its production in terms of materials, as well as, introducing a new range of products, with complex shapes, soft and with more dimensional range. All SLIDE products are suitable in residential spaces, outdoor, events and in the contract world, breaking the schemes of any traditional furnishings.

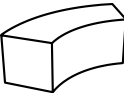

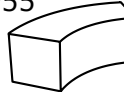

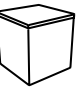

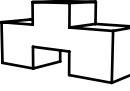

## MADE IN SLIDE PHILOSOPHY

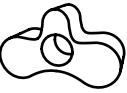

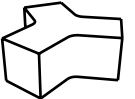

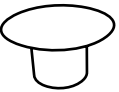

Many fields of excellence in the Italian industry use the denomination *Made in Italy*, which grants a positive value that is recognised worldwide. SLIDE strengthens this Italian identity with the denomination *Made in Slide*, by ensuring that all production processes are implemented internally: from the engineering, to the moulding, to the finishing, to the assembling, to the final stage of lacquering. Everything is rigorously made by our highly specialised staff in the Buccinasco (MI) establishments. Today the SLIDE brand is recognized all over the world as a synonym of design, quality and durability. SLIDE designs and gives life to a new conception of everyday objects, starting from a lifeless and shapeless plastic material. The infinite possibilities of this material, together with avant-garde technologies, have given life to the luminous furniture, the exceptional product which has always been the true distinctive icon for SLIDE. Moreover, credit is given to the great innovative vision of the company that recently introduced the processing technologies of foam polyurethane, that thanks to its high characteristics of softness and flexibility, has led to an extension of SLIDE's range with more functional and comfortable items.

## PRODUCTS CERTIFICATIONS

### Certifications:

- Indoor lamps are certified IP 20 as per EN 60598-2-4 IV and EN 60598-1 VI normatives (test reference 99/RPR/366). Versions I1 and I2 are for indoor use.
- Outdoor lamps are certified IP 55 as per EN 60598-2-7:98 and EN 60598-1:01 + A12:03 + A14:01 + A15:03 normatives. Version E1, E2 and E3 are for outdoor use. For version E1 the reference test is TL\_046\_12, for version E2 the reference test is TL\_047\_12 and for version E3 the reference test is TL\_048\_12.

Tests are valid for all SLIDE products. Indoor certifications refer to I1 and I2 versions, outdoor certifications are valid for E1, E2 and E3 versions.

### Materials:

The principal raw material is polyethylene, processed by rotational moulding in our plant at Buccinasco (MI) - Italy.

### Recommendations for use:

To maximize the light effect, reduce electricity consumption and the heating of the bulb, we recommend use of low consumption bulbs no higher than the maximum wattage advised. In case of over-heating we recommend turning off the light and waiting for the bulb to cool.

### Declaration of conformity:

SLIDE srl, who's legal address is via Lazio 14, - 20090 Buccinasco (MI) - Italy, declare that all its products conform to the European Union regulation and are duly branded with the EC label. The pertinent regulation is the 73/23/EEC and its successive modifications as per Council Directive of 19 February 1973 on the harmonization of the laws of the Member States relating to electrical equipment designed for use within certain voltage limits.

### Guarantee of the products:

As any product produced in the EU, our products have a guarantee of 24 months.

## CLEANING

- Unplug the product from the switch (where applicable).
- Use a damp and mild cloth not too aggressive.
- For a better cleaning, we suggest using **CLEAN UP**.
- If the products were very dirty, we recommend the use of the pressure washer.
- For most accurate technical information, refer to the data sheets for each product on our website.

## General products features

Material: Linear low-density polyethylene - LLDPE

Production process: Rotational moulding

Temperature range of use: polyethylene (-60 ° C to + 80 °)  
bulbs (-10 ° C to + 55 °)  
kit LED (-5 ° C to + 40 °)

UV Resistant

PE-LLD

All our products are 100% recyclable, furthermore grey and black colours are produced with recycled polyethylene. SLIDE production has a closed production cycle with no health prejudicial emissions and complying with eco-sostenibility rules.

## Products Warranty

All polyethylene SLIDE products are covered by a 2-years warranty.

All LED Kits and/or batteries are covered by a 1-year warranty.

## Technical key

Class 1: appliance fitted with basic insulation throughout and with accessible live parts connected to a supplementary safety circuit (ground).

Class 2: appliance fitted with double insulation or reinforced with insulation without ground connection.

Certifies the conformity of the product to the European community instructions.

The upper part of the appliance may come into contact with normally inflammable surfaces. If this symbol is not shown, the upper part of the appliance must be installed not less than 25mm from any normally inflammable materials.

Lamps with this symbol are only suitable for internal use.

Lamps with this symbol are only suitable for internal and external use.

Lamps with this symbol are suitable for floatation.

**N.B. All the wattages reported in the catalogue are recommended**  
**All IP20 products are equipped with transparent electric cable**  
**All IP55 products are equipped with black electric cable**
