

The new Comac Innova 55 B ride-on scrubber drier is able to replace a traditional walk behind scrubber drier in cleaning areas up to 3,000 sq. m.

Comac have designed a scrubbing machine that is extremely simple and cost effective to use.

Indeed, with the same investment intended for a walk behind model it is possible to have an Innova 55 B that is more user-friendly, faster and more productive in cleaning operations.

The reduced dimensions and the driving wheel give to the Innova 55B superb manoeuvrability and the ability to operate in small spaces.

It moves very easily around obstacles to complete cleaning operations in a shorter time than a walk behind scrubber drier and with considerable savings on cleaning costs.

The Innova 55 B has a single disc brush of 56 cm working width and with the Eco ON/OFF System that automatically stops the brush and water flow when the machine is idle.

**Comac Innova 55B at just
£4,495 + VAT***

(includes 2 x 12v gel batteries, on-board charger, scrubbing brush, pad holder, delivery, training and 12 months warranty)
