

Save with Steam

Effective

- Kills bacteria on contact
- Easily emulsifies grease, oil & dirt

Efficient

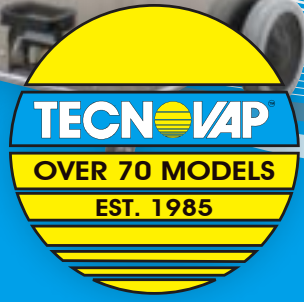

- Halves labour time
- Performs four jobs in one action:
cleans, sanitises, degreases, vacuums

Effortless

- No hard scrubbing required
- Penetrate hard to reach areas

Ecological

- No harsh chemicals or caustics
- Minimises water use by 90%

WANT IT REALLY CLEAN? USE TECNOVAP STEAM!

FAST KITCHEN CLEAN

Rangehoods

Ovens

Floors

Benches

Stoves

With a fraction of the time, water and chemical usage, commercial kitchens can be cleaned to a state of hygiene. Through the power of +150°C superheated dry steam traditionally hard to remove grease & grime can be emulsified with ease and simultaneously removed by vacuum. A large variety of standard tools allow cleaning of floors, walls, canopies, back-drops, ovens, stoves, benches, fridges and equipment. Book a free test drive today!

Benefits of Steam

- Instantly kills all bacteria on contact.
- Saves time, effort, water & chemical
- Most effective & efficient machinery
- One machine, so many applications
- Eliminates multiple OH&S concerns

Chemical Free Speed Clean

JETSTEAM *Tosca*

Small single-shot steam generator suited for small commercial and domestic use. A large 4Lt boiler allows up to 1.5 hours of continuous steam production at 145°C. With a solid stainless steel boiler and casing a Tosca will withstand the test of time.

JETVAC *Eco*

Small single-shot steam generator combined with a water filtered wet/dry vacuum system. The Jetvac Eco is the smallest machine in the Jetvac range and is suitable for small commercial or domestic cleaning applications.

JETSTEAM *Pro*

Compact but powerful continuous steam generator suited for commercial cleaning applications. A Professional features 155°C super heated dry steam, a super fast 4 minute heat up and a continuous refilling boiler allowing 24/7 steam.

JETVAC *Compact*

Compact single shot steam generator combined with a water filtered wet/dry vacuum system. With 6 Bar pressure the Compact is ideal for all small to medium sized facilities requiring high quality steam cleaning and wet vacuuming.

JETSTEAM *Maxi* 8BAR

Incredibly powerful continuous steam generator for its compact size. The combination of 8 Bar pressure at +180°C and hot water injection makes the Maxi ideal for even the toughest cleans such as commercial kitchen and industrial degreasing.

JETVAC *Pro*

Continuous steam generator with hot water/detergent injection and a wet/dry vacuum system. The total cleaning solution provided by the Jetvac Professional and the standard trolley makes it ideal for all medium to large sized facilities.

THERMOGLIDE

**TWICE AS CLEAN
TWICE AS FAST**

- SWEEPS • MOPS
- DEGREASES • DISINFECTS

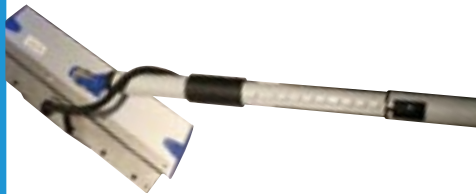

all surfaces in a single pass, whether it be a corridor, kitchen, bathroom or operating theatre.

Do you use the Old Mop recycling dirty water?

Thermoglide is making you forget all about the arduous old mop and bucket by using +130°C dry steam. Contact us for a test drive today!

TELESCOPIC HANDLE

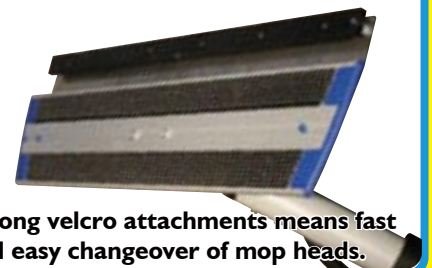

Handle extends for use and retracts for storage - with a simple flick of a switch.

SAFETY SWITCH

Convenient handle switches for ultimate control and safety. Steam is cut off when handle is released.

VELCRO HEAD

Strong velcro attachments means fast and easy changeover of mop heads.

SAFETY FIRST! - Apart from providing a superior clean the Thermoglide also reduces OH&S issues.

- Cleaning in long laps eliminates repetitive strain back & shoulder injuries.
- Slips and falls are prevented as 94% dry steam leaves floors dry in less than 1 minute.
- +130°C superheated dry steam reduces the need for harmful chemicals or caustics.
