

Green Technology Open-house

Just a few recipes for FreshAir

ACTION	SET UP	TIME REQUIRED	RESULTS
 Clean Out Ducts	Set unit near forced air intake, fan on low, and purifier on high. Close vents.	One Hour	Fresh smell, deodorized.
 Cleaner Bathroom	Leave FreshAir in each bathroom with Away Mode on. Open shower stall, cabinets, drawers, and toilet seats. Close bathroom door and leave.	2 Hours	O3 (ozone) smell will be strong, telling you that the contamination levels have been greatly reduced. Bathroom will be cleaner and fresher.
 Freshen Your Bedding	Put FreshAir under the covers of your bed; fan & purifier on high. Leave back of unit uncovered or put under laundry basket.	2 Hours	The purifier will freshen bedding as if sheets had been hung out on the clothesline. It will also greatly reduce dust mites.
 Deodorize Your Clothes and Closets	Leave FreshAir, purifier on high, fan midrange, in your closet. If the clothes are crammed together, remove half of the clothes and spread apart the ones that remain. Then swap.	1 to 1.5 Hours	The unit will clean out the cigarette smoke, musty odors, smells, etc., from the clothes and closets.
 Cleaner Kitchen	FreshAir fan and purifier on high. Aim at sink or range, oven door open.	1 to 2 Hours	Your kitchen sink and range are now cleaner and contaminants reduced.
 Freshen Your Car/Truck	Using a grounded cord, leave FreshAir in vehicle with fan & purifier on high. For best results run vehicle A/C on recirculate for 1/2 hr.	1 to 2 Hours	Stale odors have miraculously vanished.
 Freshen Your Basement or Garage	Set FreshAir with both settings on high.	Overnight – two nights for excess mold and mildew	O3 smell will be strong, which would indicate that the contaminant and musty odor levels have been greatly reduced.

Quick n' Fun Tests....

ACTION	SET UP	TIME REQUIRED	RESULTS
 The Onion Test	Rub a slice of onion on the back of your hand and then hold your hand in front of the FreshAir with purifier on maximum, fan at half power.	90 seconds	The smell should be 90% to 100% GONE.
 The Ammonia Test	Put a spot of wet ammonia on a piece of cloth or paper towel. Hold in front of the FreshAir; place the purifier knob on high, fan on low, position.	1 to 1.5 minutes	Smell the one that was NOT treated. Now smell the one that was. Compare the difference. There should be no trace of ammonia smell.
 The Tennis Shoe Test	Find a pair of dirty, smelly tennis shoes. Whew!! Set fan low, purifier high.	30 minutes	Wow! What a difference!
