Walnuts? What nonsense? This was the response that we got when we offered to them to sell our product. But curiosity won over. We offered a good deal for the first selling of the product. After a month of working with us the clients opinion on the walnut changed completely.

“Our shop really does now sell exclusive merchandise. We get a lot of money from the celebration “walnutwishes” but this is not all.

The main part is many new customers who come to buy the walnut and while they are at it they also buy some of the other products that we offer. “
