- * Top quality lamps with competitive price
- * Live Support service and quick response on customer service
- * Variety of LED models for different growing needs
- * Special customized items to suit for variety of plants growing/flowering/fruiting
- * High intensity of products for Canopy penetration

Q: Why do I need a LED aquarium light?

A: LED Aquarium Lights is this what we have in store for the future of aquarium lighting systems? Prices as of 2007 are still very high and they will need to drop significantly in price before more hobbyists will transition to them. They offer many advantages over previously mentioned lights. Some of the advantages of LED lights over conventional fluorescents and metal halides include:

- * LED lights run much cooler than standard fluorescents and metal halides.
- * LED lights consume less energy than the other lights.

What Do Our Customers Say?

The flowering was spot on

Web2PDF

- * LED have a much longer lifespan more than 50,000 hours.
- * There is no filament to break, so they could be considered more durable.
- * They can be configured in many ways due to their small size.
- * Plug and play, easy installation.
- * Don't need ballasts, starter, reflectors, air-conditioner.

Q: What's the best LED aquarium light for your aquarium?

A: Once you realized that your aquarium can not do without lighting, the next step would be to find the right lighting for your tank. But before purchasing lighting accessories for your aquarium, it is important to know what kind of lighting system best suits your aquarium set-up, and the costs involved.

The three most important criteria in determining the light you need are:

- * Lumens per watt
- * Energy-saving
- * Watts (or watts per gallon, however this term is way over used/simplistic)

More information or questions, please **contact us** for help.

to a 600w HRS, I could not tell the difference between the two.. I am very impressed with your product and will be upgrading to your 600W very soon.

North Perkin

Just bought my second one- it did exactly what you said it would do. thanx

Joyce Mcmah

This is a wonderful light and I had a very good experience. Plants seemed to take to it right from the beginning and have never looked healthier. Thanks for all the great support!

Van Senior
