Holistic Approach

Our programme does not solely rely on skill/ technique mastery. Our students are constantly challenged in problem based mini projects and tasks that aim to develop the character of the students. Our approach to character development comes in 4 phases:

- a. **Awareness-** Students will be introduced to various traits and characteristics of a whole rounded person who is successful in life.
- b. **Practice-** Case Study , games and discussion to motivate the students to articulate what they have learnt
- c. **Application-** Mini-assignments, Problem based projects and assessment will be introduced to further guide students to apply the skills they have learnt to simulated situations that are closer to the daily context.
- d. **Transfer-** Reflection/ Peers coaching/ Peers feedback will be practised at the later stage of the training. Students will be trained with higher level skills to analyse and provide constructive feedback based on self and others.
