**ACCESSORIES FOR PHILATELISTS**

# Welcome!

*Dear Collector,*

We are pleased to present our new Accessories for Philatelists catalogue 2014, containing our extensive range of accessories for stamp enthusiasts.

We possess a great passion and over 95 years of experience. Our raison d'être is to provide all collectors with attractive, high-quality accessories at the best possible value for money, whether they are complete beginners or experienced and ambitious philatelists. The global popularity of our products proves our work is worthwhile. More than 6,000 products bear the LIGHTHOUSE brand name, which has become a symbol of practicality and quality.

We are constantly expanding our range to make collecting as pleasant a hobby as possible for you. Your feedback is very important to us. Please support us with your comments, suggestions and even criticisms, and please do not hesitate to contact us at [kunden@leuchtturm.com](mailto:kunden@leuchtturm.com)

As well as a myriad of well-respected philately classics, the catalogue contains a range of new products, whilst the final section presents accessories for numismatists and a selection of products from our relatively new brand, Jäger & Sammler, designed for alternative collections such as bottle caps, beer mats, pin badges, figurines and much more.

Have fun flicking through; we are sure you will find something! Perhaps our popular GRANDE classic ring binder with matching slipcase, for example.

Best regards,

Max Stürken

Kurt Stürken

Axel Stürken

# Albums for postcards

## Postcard albums

Due to the diverse nature of their designs, postcards are an interesting item for collectors. However, many supposed non-collectors often accumulate a considerable

amount of postcards which are then a shame to throw away. Before the cards end up in boxes or drawers, why not store them in one of our postcard albums?

1

2

### The perfect storage solution for your valuable and unique memorabilia.

Albums with 50 bound sheets\* for storing 162 x 114 (6 1/3 x 4 1/2") postcards. The sheets keep the postcards securely in place and protect them against dust and dirt. They are made from clear plastic to allow the cards to be viewed from both sides. Practical and hard-wearing thanks to a wipe-clean cover.

## Brand quality made by Lighthouse

Stockbooks are simple bound stamp albums of heavy card pages with strips to hold the stamps.

They are available in an endless array of sizes, shapes and colours. Some have rigid, book-like bindings, others are equipped with flexible double-hinged pages.

Stockbooks are useful for storing stamps not yet given space in printed albums, as well as keeping duplicates and extra stamps for trading. They are also recommended for starting topical collections or "safe-keeping" your most valuable stamps in deposit boxes.

Available in 5 colours with hard or padded covers.

**Embossed gold strips** give the cover a sophisticated look.

Tried and tested **double-hinged binding (DLH)** means pages lie flat (doesn't unlock).

**Hard-wearing leather\* or leatherette cover.**

**Double-sided interleaves** (glassine or clear film) guarantee optimum protection for your stamps.

**High-grammage card.**

\* Regenerated leather (85% natural leather fibres).

**Discerning philately demands a professional basis and a love for detail:**

## **LIGHTHOUSE pre-printed albums**

The LIGHTHOUSE album series has been prepared with so much expert knowledge and love for detail, hence material and production must be of a high quality.

With a large choice of over 140 collection areas and editorial philatelic processing by our specialised editorial office, LIGHTHOUSE pre-printed albums satisfy even the demands of experienced and competent philatelists.

Stamps of the same kind which vary in e.g. colour, perforation or printing process have their individual characteristics noted on the respective album page. This only applies to stamps with MICHEL (major) numbers. Also includes the year where required.

This label can be located next to or, in the case of in-laid stamps, underneath the SF mount according to the type of information in question. In this way we always ensure an aesthetically-pleasing overall presentation.

LIGHTHOUSE prints its album pages (size 270 x 297 mm/10 <sup>9</sup>/<sub>10</sub> x 11 <sup>2</sup>/<sub>3</sub>"/13-hole system) on non-ageing wood and acid-free card (170 g/m<sup>2</sup>) in high-resolution black and white offset print.

The SF protective mounts, free of chemical softeners and with a clear non-reflecting film the same size as the pre-printed stamps, are stuck onto the album card. These hold the stamps in place and prevent them from getting stuck. At the same time, they offer ideal protection against dust and dampness.

Of course the LIGHTHOUSE pre-printed album pages are also available without the SF protective mounts in the so-called "Normal" edition.

Many LIGHTHOUSE illustrated pages are available in a standard version without SF mounts.

LIGHTHOUSE binders come with different mechanisms and designs, so you can decide which storage style best suits your purpose. Here, too, quality and a great love for detail are at the forefront of our objectives. Hence LIGHTHOUSE binders, with their high-quality and robust covers with gold embossing, are often a long-term escort for any collector (see pages 61–67).

## The advantages of LIGHTHOUSE illustrated albums

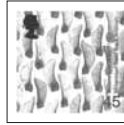

Pre-printed albums are available in a large variety of colours.

Year for the Millennium Project

Ellen Project, St Austell

Millennium Seed Bank, Wakehurst Place, Surrey

Forest for Scotland

Superior black and white print quality – you can immediately spot the missing stamps in your collection.

Optimum protection for your stamps using the appropriate SF mounts (100% polystyrene, free from chemical softeners and stabilisers).

Card is acid-free and wood-free.

13 punched holes, meaning sheet remains in position in the binder, elongated punched holes to ensure sheets remain flat.

Ideal for different types of binders (springback, ring and turn-bar binders).

## OUR COLLECTORS' TIP:

**Supplements:** You can always keep your LIGHTHOUSE albums up to date with the annual supplements. Supplements appear each year for stamps issued in the previous year.

# —Country album pages Great Britain—

The LIGHTHOUSE Great Britain hingeless album is unmatched in detail, accuracy and quality and is the benchmark for all others. Using the Stanley Gibbons Great Britain catalogue for guidance, each stamp is represented by a photo image and necessary technical information. Since Elizabeth II, commemoratives and definitives are housed on separate pages, as are regional issues and postage dues.

Each album comes complete with our titled binder Ref. No. 327 841 (see page 31, 32, 35) and matching slipcase.

**Volume one** commences with the birth of the postage stamp in 1840 during Queen Victoria's reign, and continues right through covering the four Kings and Queen Elizabeth I up to the pre-decimal period to 1970. Contents: 103 pages

**Volume two** continues with Queen Elizabeth II from the beginning of the decimal era 1971 through to 1989. This volume gives exceptional detail to the Machin definitives and covers these issues from 1971 to 1993. Contents: 89 pages

**Volume three** covers the period 1990 to 2004. The in-depth detail given to definitive issues continues and commences with the elliptical series from 1993. Contents: 120 pages

**Volume four** continues with the reign of Queen Elizabeth II from 2005–2011. Contents: 106 pages

The decimal definitives in volume three are classified as standard issues SG Concise guidance. Those collectors who would like even more detail can enhance their collection by adding the specialised sets. More information on these issues can be found on page 43.

# LB sheets

LB sheets are card sheets in album format which come with a welded protective pocket. The film for our LB sheets is made from 100% polystyrene. Leading archives and museums worldwide recommend polyester for the long-term storage of stamps, records and other valuable documents. The practical LB system with all its different combinations of strips and pockets was developed after years of research and careful study of collectors' needs. With the LB pages you can give your collection that special personal look. They are particularly useful for topical collections or adding special items to existing country albums. You can design any combination or grouping you desire. Mint sheets, maxi-cards, FDCs, booklets, singles, block souvenir sheets, even postal stationery. The blank system is also ideal for storing and displaying new stamps prior to receiving your new supplements.

Overall size of the LB page is:  
270 x 297 mm (10 <sup>3</sup>/<sub>4</sub> x 11 <sup>3</sup>/<sub>4</sub>" ).

# SF mounts

D = Doragard  
(closed top and bottom,  
open at back)

d = double seal  
(closed top and bottom)

## Simply the best and safest mount for your stamps

- Maximum protection against sticking, discolouration, dust and humidity.
- Stamps held securely in place by strong clamp-type seal.
- SF mounts are made from 100% polystyrene (free from softening agents, acids and stabilising chemicals).
- Antireflection coating prevents light interference.
- Special adhesive on reverse side of film (simply moisten and stick down!).

### 1. LIGHTHOUSE pre-cut SF mounts

For most standard sizes. Please note: the size of the mount is cut 4 mm larger than the actual stamp for that nice "centred" look. The sizes listed in the chart represent the size of the stamp. You do not need to add extra margin.

### 2. LIGHTHOUSE SF strips

217 mm (8 1/2") long, in various heights. Here, too, the strip is 4 mm higher than the given stamp size. Cut the width to your requirements.

### 3. LIGHTHOUSE SF mounts for blocks

In most popular sizes. For postal stationery, blocks, mini-sheets etc. Extra large mounts have double seams. More information on pages 40, 41 and 75.

## **Did you know?**

### **Magnifiers with 2–3X magnification**

These magnifiers are suitable for viewing whole stamps and coins. The image found on the object can be easily viewed with their help and the fine details become visible. These magnifiers can also be used as a reading aid.

### **Magnifiers with 5–7X magnification**

The majority of details can now be identified. Unfortunately, increased magnification of the diameter lens also means reduced reading surface. The distance between the eye and the magnifier as well as between the magnifier and the object is minimised.

### **Magnifiers with 10–20X magnification**

You are now very close to the collector's piece with this magnification and the smallest details are visible. Individual pixels can be differentiated for the majority of printing processes. You can't get a finer detail than this.

### **Microscopes**

Intaglio printing becomes more vivid, microprinting can now be viewed more easily and safer, and plate flaws are more easily detectable.

### **Light**

A good source of light is vital but not always available. LED technology now gives light to even the smallest of magnifiers so that objects being viewed are well illuminated. You can now purchase LEDs with long-wave UV light for identifying fluorescence.

### **Digital microscopes**

With the help of digital technology, the stamp or coin being viewed appears on the screen. MACRO CAM does not even require a computer and can be easily used whilst travelling. The software included in the package enables objects to be recorded, stored and photos edited.
