SYNTHETIC TURF

Compacted Class 2 Road Base

Smart Grass Synthetic Turf

Artificial grass is such a flexible surface that it can be used for nearly anything, even inside, and with this in mind; we've placed a post along today to debate the benefits of artificial grass for the playground. So, if you have any of the nursery or playgroup and you currently have a natural turf, by the time we've explained the clear benefits to having

artificial turf for playgrounds

, we think you'll be able to consider this fantastic alternative to natural grass.

Children are encouraged to spend longer outdoors to induce some much-needed exercise and to delight in some creative thinking, learning, health, help improve social skills and for overall well-being. As you can imagine then, where there are teams of kids, in nurseries or school playgrounds, there'll be a designated space for play, where kids can feed their imagination and socialize with their peers.

This can typically be hampered by bound factors, one amongst those being allergies. If children suffer from allergies like hay fever, then going outside becomes a nightmare. Instead of putting kids through that, by having artificial grass put in, you stop all this. No allergies and no sick kids, they will play outside with their symptoms drastically reduced.

- **No mud inside the home**

Playing on a natural surface is okay once there's dry weather; however as we live in a country that has its fair proportion of rain, we all know that it doesn't stay dry for long. When kids play on wet damp grass surfaces, there's sure to be mud and grass which then gets transported to the next space they play in, maybe in a part where there isn't supposed to be any grass and dust. It'll conjointly get dragged inside within the classrooms and corridors.

Artificial grass is a way of ending the matter of grass and mud everywhere. They'll have wet feet yes, however they won't be dragging grass and mud in unwanted areas or conveyance it indoors.

Natural grass that sees lots of pedestrian traffic would require a lot of maintenance too because the grass can need cutting, trimming then it'll need chemicals to keep weeds, moss, and insects from damaging it. All this money that has been saved could be used elsewhere

As it turns out, the **best artificial grass for dogs** needs to be people friendly too. You can confidently select **fake grass for dogs** from Smartgrass to make the rich and exquisite landscape you've always wanted. And you can choose Smartgrass to create a personal outdoor space just for your pup, too. Our Heavenly Greens specialized turf for dogs elevates outdoor living for every member of the family.

Pet Systems

Our Pet Systems use a shorter and more pet-friendly turf with flow-through technology alongside an anti-microbial infill system.

We always wish the best for our dogs, our greatest friends. Which includes a secure and useful outside play area? However, some owners still believe that they can't enjoy the benefits of an artificial grass lawn because they have a dog. If you're one of these owners, here is tail-wagging news for you – If dogs are your best friends, artificial grass is their best friend.

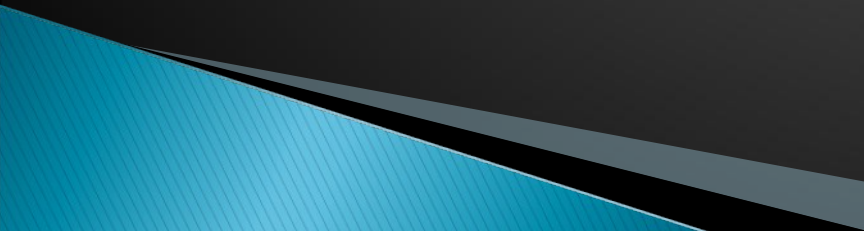

Benefits of Smartgrass

- owners have converted to artificial grass in droves as a result of it makes so much more sense.

It is simple to keep up. No mowing or all that alternative work demanded by natural grass. You save time and money, and also the results look so much better! Even when your dear dog does his thing on the grass, clean-up is simple. Poop is simple to pick up, and our MAX_FLOW technology ensures urine drains all the way through, and so all it takes is a fast squirt with the hose to get rid of residue and odors.

- It is clean naturally. No trimmings, no dead spots or bare dirt that makes mud and mess. Artificial grass gets a clean bill of health, too. It's non-allergenic and 100 percent toxin-free. It produces no pollen to trigger allergies in humans and pets. And it doesn't give a tempting environment for mosquitoes, fleas, mites, ticks or other pests that hassle dogs and humans, too.

- It is environmentally-friendly. You're a part of the solution rather than part of the problem after you stop applying fertilizers, pesticides, herbicides, etc. to your lawn and when you no longer have to waste water to keep your lawn alive. Not solely that, someday years from now when it's time to switch your artificial grass, you'll be proud to know it's totally recyclable.
 - it's robust as dog nails, yet soft and comfy. no matter how usually your pup gets the zoomies, he can't wear out artificial grass. He can't dig holes in it, either, no matter how dedicated he is to the task. And once he's prepared for a nap, artificial grass is welcoming. You've chosen the most effective for it, and it appreciates that.
