Home Security Cameras York

The CCTV Installation industry has come a long way in the last 10 years, from the 420TVL, 600TVL or even the 700TVL dinosaurs, so if you are one of those who in the past few years have purchased the ***old analog Surveillance System*** that used to come with the small cameras and the short pre-made wires that just did not look professional no matter how you tried to install it, its time to change your cameras, that has become a thing of the past. In today`s age HD, Security Cameras are the perfect way to get a clear picture of a thief in the darkest of gardens. They come in 720P or 1080P resolution. The beauty of our HD technology is that you do not have to replace the wires. Just get in contact with CCTV Installation York.

In today`s age HD, Security Cameras are the perfect way to get a clear picture of a thief in the darkest of gardens. They come in 720P or 1080P resolution. The beauty of our HD technology is that you do not have to replace the wires, just unplug the *old camera and plug the new HD Security Camera*. Or if you need something even better we can offer you an IP Megapixel camera that can work as a Wireless Night Vision Spy Camera as well all the up to more than 5 Megapixels. Make sure to give us a call today at **0800 0132341** to speak with one of our experienced surveillance camera installers in York.

Security Services York and What we Do

CCTV Installation York and Security Products offer Professional Security Installation services that vary and depend on the type of job you are looking for. Our professional contractors have the skills to craft a complete security system from Alarm systems, access control systems to video surveillance & security camera systems. A typical CCTV Installation for Home security cameras can usually be undertaken by a single man install team (a single family home up to two stories).

For Commercial/ Business, CCTV installation York services recommend a floorplan overview and/or a site survey. Standard equipment used during a CCTV Smart Systems Security Products installation service can include but is not limited to, a security recorder (DVR/NVR), CCTV Security cameras, access control panels, access control readers, alarm sensors, power and video cabling. On our initial walk thru, we can address all security requests from alarm systems, to access control to surveillance. During our walk-through and consultation, our installers will create, design and estimate the system that will best fit your budget and CCTV Installation security requirements.

Need Professional Installation Services?

Do you want your home to be protected against theft and break-ins without the burden of high monthly fees? Don't wait until your family is a victim of crime. Fill out the easy questionnaire and we will recommend you an installation company within 24 hours for a free home security needs assessment to see how affordable a video security system can be.

Best security cameras

Today in a most have, in the past an alarm system was enough to secure your home, but today with the changing demographics, and constant fluctuation of the economy security is a sensitive matter even for a home in gated communities. Best security cameras and home surveillance system gives you backup of those undesired events that might take your peace away, with best security cameras the DVR unit will maintain records for a time that will give you the chance to recover that footage and give it to your local authorities when having the need to proof those situations that no one wants to mention. Call the experts of CCTV Installation Video Security to give you an estimate of a Home Security System for your property.

Here is a list of CCTV Manufacturers we use

When dealing with CCTV Installation York systems and Security Solutions has a vast knowledge & experience to ensure we select the appropriate solution for you.

Our engineers were dealing with CCTV back in the days of analogue tube cameras and have followed the developments with CCTV through to the latest technology. These days we are often using advanced solutions including HD, megapixel, IP and video analytics.

We have installed and support systems from basic stand alone entry level systems that meet your budget through to multi-site networked systems in excess of over 1,000 cameras dispersed over a wide geographical area. With the higher use of IP technology, our services have been extended to encompass providing and managing data network infrastructure plus working with your IT provider.

We also install CCTV into a wide variety of environments and locations for all market sectors.

We start by responding to your specified performance requirement or offer advice to provide systems that will genuinely deliver the performance required.

Most systems fall into two distinct categories of operation:

- Proactively monitored systems (operators using the system to monitor and track live activity)
- Reactively monitored systems (systems that alert the operator of an event detected by the system or where you retrieve recorded information of an event).

Sometimes CCTV is used as a point of referral, where the client does not monitor the system and only uses CCTV when an incident has been reported.

This is often due to staffing arrangements.

Customer Consultation to provide the best system for you

When dealing with customer requirements, we always ask how you intend to operate your system and what needs to be protected by CCTV and then base the solution around this fundamental criterion. Our design principles are to NOT over specify and always provide a modular/expandable solution which has the flexibility to account for future needs and possible changes.

We are accredited by a wide selection of leading manufacturers to design, install and support their equipment.

Our designs are always industry compliant and correctly deal with the appropriate legislation concerning CCTV, for example, The Data Protection Act for CCTV. This ensures you are managing and operating your system correctly and the recorded information can be used as criminal evidence when required.

HOW TO CHOOSE THE RIGHT SECURITY CAMERA

1

UNDERSTAND SECURITY CAMERA TYPES

- Infrared (IR) security cameras.
- Dome cameras
- Pro box cameras
- Pan tilt zoom cameras
- Hidden cameras.

2

ADVANTAGES OF INFRARED (IR) SECURITY CAMERAS

- Infrared Cameras produce high resolution color video during the day. In low lux (light) or no light conditions they are the preferred camera type. Whether being used indoor or outdoor, they provide a huge advantage in low light or no light situations.

3

ADVANTAGES OF DOME CAMERAS

- Expect a clear color high resolution picture with the dome camera.
- Most pan tilt zoom cameras are in a dome type housing as well.

4

ADVANTAGES OF PROBOX CAMERAS

- Lenses can be changed on the pro box camera based on the viewing angle and zoom that is required.
- Some Pro Box Cameras are called day / night cameras as they can switch from color during the day to black and white in the evening or in low lux (light conditions).

5

ADVANTAGES OF PANTILT ZOOM CAMERA

- Pan tilt zoom controllable cameras require one additional cable for operation. A CAT5 cable is needed in addition to the power/video RG-59 Siamese coax cable in order to control it live and over the internet. Simply run a CAT5 cable next to the RG-59 to control your pan tilt zoom camera.

6

ADVANTAGES OF HIDDEN CAMERAS

- These offer perhaps the highest degree of surveillance.
- The main disadvantage is that hidden cameras do not have infrared capabilities which limit their

7

WIRED OR WIRELESS

- Wired cameras offer a larger

● Wired cameras offer a larger selection of cameras and more importantly, much better video quality

● Wireless cameras can somewhat be misleading as they need to be powered at the camera location. In addition, they require a line of sight with no obstacles, which often poses an issue.

performance in low light.

CCTV Installation York Guide to Camera Manufacturers

Closed-circuit television (CCTV) is a fact of modern life. Whether it is in a private household, a business, social venues, or even just a regular street, the use of a CCTV gives a measure of reassurance that crime does not go unrecorded. Closed-circuit television means no one outside the circuit can view the images (as opposed to a broadcast image). However, the quality of the recorded image depends on factors such as the lens type, camera quality, recording facilities, or even the capability of a live-time viewer. All of these factors are influenced by the camera company, so choosing your provider with care is critical.

- 1. Arecont Vision

- 2. Dedicated Micros
- 3. Bosch Home Security
- 4. Samsung Techwin
- 5. Vicon
- 6. Tyco
- 7. Visonic
- 8. Siemens
- 9. American Dynamics
- 10. DVTEL

Contact CCTV Installation York to get more information on CCTV and security cameras here today or call 07860244274 and speak to Gary Pearce direct about the best choice in Systems for homes and businesses. [Click Here to reach the Contact Us Page.](#)

1. Arecont Vision employs digital technology, rather than analog, to generate CCTV images. Its products include features such as ultra-low light level capability, which means the cameras are able to record usable footage in very dim lighting. The company offers a strong IT support system, which the customer can access via phone or the Internet, and it includes helpful facilities such as regular webinars on product use.

2. As a company, Dedicated Micros boasts an impressive array of industry accolades that recognize the reliability and effectiveness of its products. This company services a wide range of public and private sectors sites, including casinos, banks, hospitals, hotels, and shopping centers. In part, this is due to the popularity of its 360-degree cameras, which give a true, undistorted bird's-eye view of large rooms such as casinos or airport lounges.

3. As the name suggests, Bosch provides CCTV and security for the domestic user. Bosch cameras and equipment are high quality and provide good resolution, with the recorded images of an acceptable standard to be admissible evidence in court. From basic models to more complex technology with motion sensors that are low-light enabled, Bosch offers a wide range of options suitable for the homeowner.

4. Samsung offers the latest technology suitable for professional security companies or home use. Samsung security cameras have impressively high resolution and capability in low-level light. The parent company specializes in robotic technology, and this reflects in the automated camera options, such as voice recognition, motion sensor, and auto-zoom facilities.
5. Vicon offers a complete and integrated system, from cameras to recording devices. Some models of cameras are capable of car number plate recognition. As well as routine monitoring, the company can survey and monitor security at special events.
6. Tyco is a global business that likes to assess each business's specific needs. It caters to businesses of any size, from small offices to large corporations, and tailors its products accordingly. Tyco has a company ethic of helping customers understand where their security weak spots are, and it uses this knowledge for optimal placement of camera systems.
7. Visonic offers security for the home. Its integrated approach means that the top-of-the-range service includes real-time monitoring with the operator assessing the situation before raising the alarm. For entry-level security, Visonic provides quality and reliability in cameras designed for home-installation.

High Definition Hikvision Cameras

Learn About Hikvision Installation

According to yearly independent research data from IHS Market, Hikvision CCTV accounted for 19.5% of market share in global video surveillance industry in 2015, up from 4.6% in 2010, and has been ranked the No.1 market share leader globally for video surveillance equipment for five consecutive years. In 2015, Hikvision was ranked first in EMEA market with 12.2% market share and was ranked second in Americas market with 7.3% market share.

CCTV Installation York Know that Hikvision provides video surveillance products and vertical market solutions in the global market, through more than 2,400 partners in 155 countries and regions. In mainland China, Hikvision now partners with more than 40,000 distributors, system integrators, and installers. The Company's products and solutions have been widely deployed in a number of vertical markets and in notable facilities around the world including the Beijing Olympic Stadium, Shanghai Expo, Philadelphia Safe Communities in the U.S., South Korea Seoul Safe City, Brazil World Cup Stadium, the Italy Linate Airport, and many others.

Hikvision is dedicated to providing global resources and locally-based technical, engineering, sales, and service support to its valued customers around the world. In Hikvision's overseas sales team, about 90% of the employees are local residents; for example, Hikvision European has about 210 employees, among which, over 190 are locals.

Our second recommended brand is Qviz

Qvis is one of the Leading Innovators In CCTV Security Products.

Qvis leads the way in innovation and has done since its inception. We were the first to integrate a CD Writer into our recorders and the first to offer the Eyeball Dome – now the best-selling camera in the world.

Our continued passion for providing cutting-edge and affordable technology to our customers drives our business and is the instrument we use to ensure we deliver well-grounded solutions over and above that of just security. Qvis is now the choice of security professionals around the globe, constantly growing in stature, and is known as a brand that doesn't compromise on quality.

Qvis has paid constant attention to R&D, design, and manufacturing and has committed significant investment and resource in this area. Our products are designed to the highest standard, inspired by technology, innovation and problem solving whilst retaining fundamental core values in user ability, functionality, and reliability. And that's why CCTV Installation York love Qviz.

Full HD
1080 HDMI QVIS®

Thermal. Dual. Decentralized

Weatherproof thermographic PoE camera for detection plus a 6 MP sensor module for identification.

At CCTV Installation York we offer The best in Thermal Cameras and they are a modular design of the M15/M16 system platform ensures maximum flexibility for the MOBOTIX thermographic camera. The M15-Thermal comes standard with a thermal image sensor and a dummy module (to remain weatherproof to IP66).

In addition, it is possible to use any MOBOTIX sensor modules (6 MP, color or black and white, telephoto to Hemispheric, with or without long-pass filter/LPF) in the M15/M16 Thermal for identification. The camera software is then used to activate the dual image display on one of the two image sensors (thermal or standard) or both simultaneously. Contact CCTV Installation York to learn more about the Thermal Image Camera Installations.

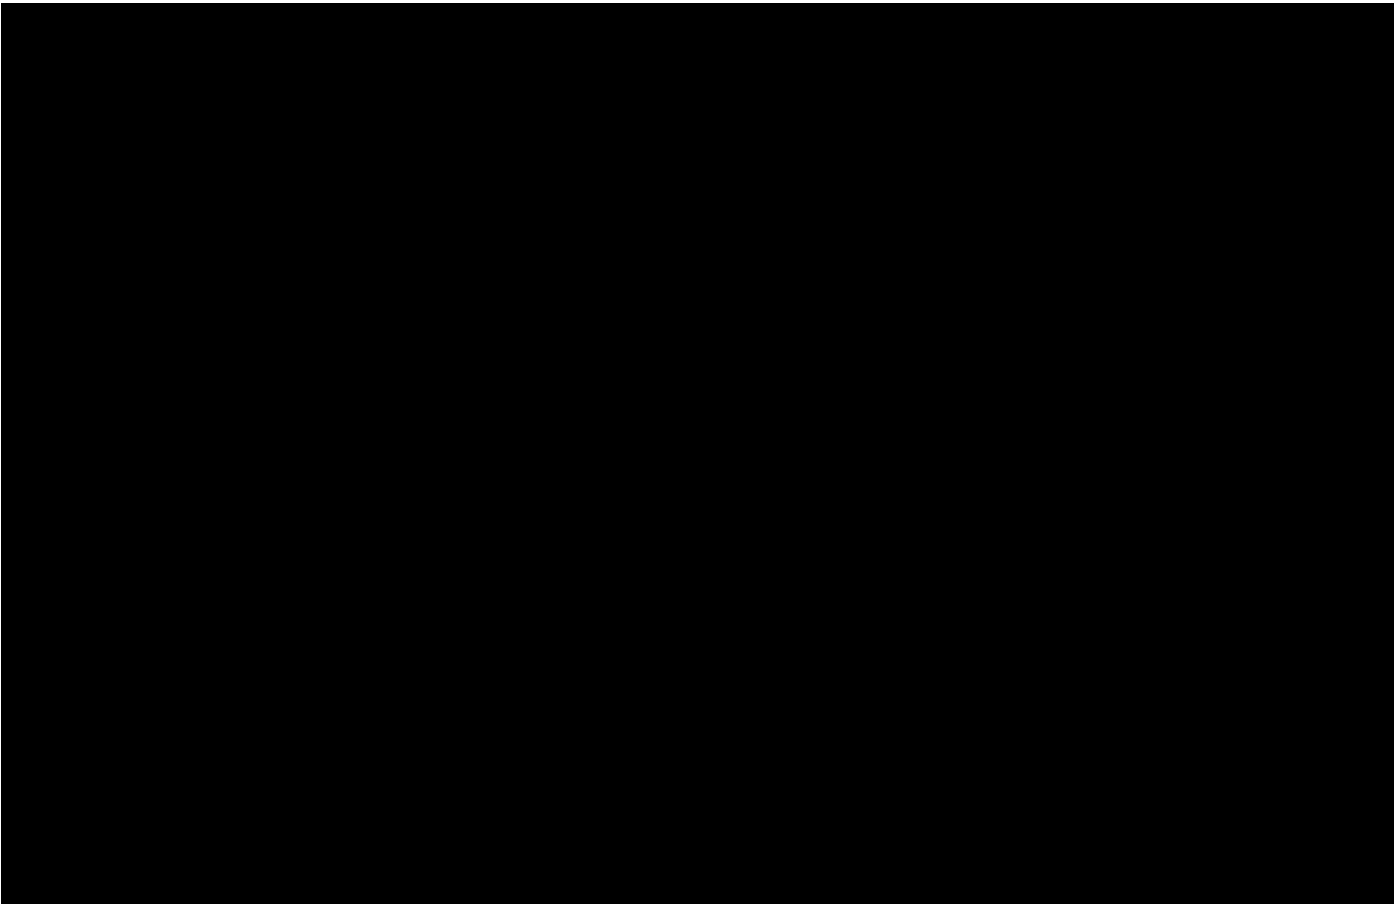

[Learn More Here](#)

Important Features

- **High-end thermographic camera with thermal sensor of typically 50 mK and a temperature measuring range of -40 to +550°C/-40 to +1022°**
- The thermal sensor is capable of detecting in complete darkness and/or through smoke, smog, or a thin plastic film (limited during thick fog); applications include border protection: view of the sea in coastal areas, ships in the distance can be recognized in hazy conditions.
- The combination with the MxActivitySensor, in particular, delivers extremely reliable video analysis results of person/vehicle movements, as it is now possible to block out disruptive factors such as regular movements of “cold” objects such as bushes, grass, water, clouds, waves etc.
- No glare from strong sources of light (such as headlights, hand-held lamps).
- Detection of hotter than average body parts or technical devices, detection of faults in photovoltaic systems, overheated machine bearings etc.
- Low camera power consumption of max. 5.5 W (thermal sensor plus 6 MP sensor module, without additional MxBus devices).
- The thermal image sensor is configured using camera software in a web browser; it is possible to display the thermal image with all other MOBOTIX user software (MxMC, MxEasy, MxMC, App).

CCTV Installation York Install 5 Megapixel IP Network Cameras and Security Camera Systems

The resolution of IP cameras is measured in Megapixels and they record in HD and Beyond

Because IP cameras are digital cameras you measure their resolution in megapixels rather than TV Lines. TV Lines is the measurement of old 1980's-TV quality cameras.

Our IP cameras come in four resolution options: 2.0MP which shoots at 1080P, 3.0 MP (which is 1.5x 1080P). 4K (which is 4x 1080P), and 12 MP (6x1080P).

You record an IP camera with an NVR. Some NVRs on the market are really terrible (and can't record HD footage on every channel), but all of CCTV Installation York NVR's can record at least 1080P at 30 FPS without any frame rate or camera limitations.

Outdoor security cameras installation

An Outdoor Security Camera system is a purchase decision always involves installation, and no one better than CCTV Installation York Video Security to guide you make the best decision. It is true that CCTV is a technology that has been under development for many years, and today you can find pretty attractive prices for Outdoor Camera packages, but the truth is that many of those extremely low prices are just the lowest quality equipment meant to suffice a demand of Cheap Outdoor Cameras. So our best recommendation is to trust your Security Outdoor Cameras Installer and get professional Outdoor cameras instead of taking short cuts that for sure will bring you back to spend in a professional surveillance system.

Not every CCTV camera is the same if you were a photographer could've been more aware of the multiple variations of the technical specs of a camera. surveillance cameras have to be chosen accordingly to the required angles distances, and lighting conditions. Most first time buyers fall into the trap of purchasing a camera just by comparing the resolution. Feel free to contact CCTV Installation York anytime for more information.

High Definition Dome Cameras

In the past having a security dome camera was a privilege of a corporation, government facility or a luxury home, but not anymore. With the increasing population in urban areas and the changes in the economy, having a security dome camera is a must for any house office or

warehouse, security dome cameras are not anymore a matter of a luxury security device, but part of the surveillance equipment that you must have to protect your property. At CCTV Installation York we can mix your Home Security Dome Cameras and Office Cameras in a single viewing Platform so you can see both locations in your Smart Phone, Tablet or Computer, check with us about the technical requirements.

Surveillance cameras not only can be compared to their resolution but also by cheap set, Infrared distance, sensor type, water tolerance, chip's brand, and much more, but we understand that taking all these specs in count to do a one-time purchase can be overwhelming, so get a professional Surveillance System from a specialised place that you can trust and give alternatives and support.

How HD security camera system works for you

- **HD security camera** gives you the mental relaxation when you are out of home or your workplaces.
- **Sometimes this** surveillance method is used to control the criminal activities.
- **In school**, it is used to track the activities and unacceptable student behavior.

- In Shopping Centers and retailing shop, it is used to monitor the buyer and sellers' activities, and to track the other entire undesired incident so that the offender may be punished easily.
- **HD security cameras** are frequently used in transportation system for the safety reason.

Why are we better from others?

- CCTV Installation York installs and maintains industrial, commercial and residential **HD security camera installation service** with much more professionalism and great attention.
- Before installing this equipment, we visit the site which adds no additional charges.
- All our technical staffs and engineers are fully trained and highly skilled with immense professional knowledge and experience so that they may meet all the required needs of the clients.
- We always assist our customer at every stage without any charges.

Why Not Have A Pan Tilt and Zoom Camera Installed

PTZ Camera Installation York

CCTV Installation York installs PTZ Cameras that are recommended for areas where there are far objects to cover, and locations where would be impossible to set as many cameras as required to cover the entire place, like parking lots, constructions lots, or similar places. these moving cameras are also popular for convenience or retail stores where there will be a security person tracking multiple areas from a Security Room.

We offer PTZ Security Cameras installation in our CCTV Service Coverage Service Area, call us for more information.

PTZ Cameras

When you start looking for a PTZ camera you might or might not be sure what the PTZ term stands for in the CCTV language, PTZ stands for (Pan Tilt Zoom), meaning that these three words describe the most relevant features of this robotic style cameras. PTZ Cameras are a great tool for those locations where there is not fixed point to watch, and there are many variables or situations that you want to cover with just one surveillance camera.

PTZ Camera Types

PTZ cameras come available in Analog technology (TV Lines), CVI Technology (High Definition Analog) TVI (High Definition Analog), and IP. All PTZ cameras Pan and Tilt by default but the main difference to keep in mind when choosing a PTZ camera is the zooming capability, the most common PTZ cameras can zoom in a range from 10x ~ 32x, and the zooming is also different if is digital or optical, being optical the best zooming resolution, as it means real zooming vision made through the camera lenses, while digital zooming is made through software.

PTZ Camera Features

- Panning feature, that allows these cameras to rotate 360 degrees be able to get back to their original position.
- Tilting feature is the option of going up and down even during the Panning cycle without creating any delay or affecting the panning feature.
- Zooming will give your PTZ Camera the capability to zoom in, and zoom out objects
