TV Aerial and Satellite Installers Training Warrington

by Gary Alan @ TV Aerials Warrington

DESCRIPTION

At a time of increasing change within our industry, training, and education is essential if you want to keep abreast of the latest technology, design and installation techniques. The TV Aerials Warrington's intense programmes are designed to develop skills and competencies necessary to meet the demands of the aerial and systems installation industry.

Please note that successfully passing any TV Aerials Warrington Training Course does not give you membership of the Confederation and use of the TV Aerials Warrington logo is not permitted. Nine of our programmes have achieved City & Guilds Accreditation which recognises the process and delivery of a bespoke training programme. These are not City & Guilds Qualifications, and you will not be authorised to use the City & Guilds logo. Please note our training processes and systems have been Accredited, not the content of our programmes or the TV Aerials Warrington as an organisation. You will receive a TV Aerials Warrington training certificate which contains the City & Guilds Accredited Programme logo.

TV Aerials Warrington Accessibility Policy

The TV Aerials Warrington welcomes applications from potential participants of all social and ethnic backgrounds. Its enrolment policy aims to promote equal opportunities, while at the same time selecting participants who have the ability and motivation to benefit from the courses that they intend to follow and who will make a contribution to the Industry. To this end, in the spirit of the Equality Act 2005, the TV Aerials Warrington will undertake reasonable adjustments for qualified applicants with disabilities to enter the TV Aerials Warrington Education and Skills Programme, in accordance with the provisions of the Act. Any applicant who needs to report any disabilities to the TV Aerials Warrington, please do so at the time of booking, or shortly after in order for the learning programme to be adapted and cater for your needs.

We cover a 20-mile radius of Warrington for all of our aerial services. When you book in a visit from the engineer we really try to make sure we get to you on time as we understand that you may be taking time out of work to be at home for the visit. If at all we are running late we would always phone and let you know.

When we get to your property we aim to be able to fix or install on the first

visit and we carry all the latest TV aerials, satellite dish equipment required to do almost any job-related. The only thing we buy in to order is the TV Wall brackets, but we would get this once the job is booked in. Our Fitters will tidy up after themselves and will wear boot covers when entering your home.

Do you require a new Digital Television Aerial for BT Vision or Freeview? Whether it's a replacement, or for a new build property that needs a loft aerial installation

etc we offer a fully guaranteed service. When we carry out any install work we look to hide as much of the coax cable as we can. It looks so much better if the cable is less visible and hidden where possible.

So, whether you want a simple repair or you are getting 'no signal' on your TV or you require a completely new aerial system to 6 or more rooms in your house we are the fitters for you. Our NVQ qualified engineers will always look to the best solution for you

We are Sky dish installers for the Warrington area, this means that we can set up your Sky system, fit or repair a satellite dish, realign your dish if it's been blown about by the wind and you are no longer getting a signal. We reprogram sky receivers if they are playing up and can do anything satellite related such as Freesat or other foreign types of system for you.

With 10 years plus of experience as satellite TV engineers, there is nothing we can't do within reason. We will even fix your dish on a post at the end of the garden for you if it's the only place on your property that gets a signal. We do our utmost to provide you with a service that is second to none, & of course, all of our work and equipment comes guaranteed.

Ever since the flat screen TV came out we have been hanging these televisions on walls. We pride ourselves on the fact that we always get them level, (not an easy thing) & that all of the TV wall mountings we have done look good after we're finished. Whether you have a small 17" TV or a 72" we have the knowledge, experience, and expertise to fit your TV securely.

We can also provide and fit trunking to hide away the unsightly cables so the whole thing looks good. We can fit your Telly on either a stud wall or a solid

brick wall and we also provide decent quality TV wall brackets ideal for the TV and wall for your install. You don't want to leave this to an amateur when we put up a TV it stays up.
