

Gary Alan @ TV Aerials Warrington

TV Aerial Installers Warrington

We cover a 20-mile radius of Warrington for all of our aerial services. When you book in a visit from the engineer we really try to make sure we get to you on time as we understand that you may be taking time out of work to be at home for the visit. If at all we are running late we would always phone and let you know.

Warrington aerial Installers

When we get to your property we aim to be able to fix or install on the first visit and we carry all the latest TV aerials, satellite dish equipment required to do almost any job-related. The only thing we buy in to order is the TV Wall brackets, but we would get this once the job is booked in. Our Fitters will tidy up after themselves and will wear boot covers when entering your home.
