Profile

Introduction

We cover a 20 mile radius of Warrington for all of our aerial services. When you book in a visit from the engineer we really try to make sure we get to you on time as we understand that you may be taking time out of work to be at home for the visit. If at all we are running late we would always phone and let you know.

When we get to your property we aim to be able to fix or install on the first visit and we carry all the latest TV aerials, satellite dish equipment required to do almost any job related. The only thing we buy in to order is the TV Wall brackets, but we would get this once the job is booked in. Our Fitters will tidy up after themselves and will wear boot covers when entering your home.

Do you require a new Digital Television Aerial for BT Vision or Freeview? Whether it's a replacement, or for a new build property that needs a loft aerial installation etc we offer a fully guaranteed service. When we carry out any install work we look to hide as much of the coax cable as we can. It looks so much better if the cable is less visible and hidden where possible.

So, whether you want a simple repair or you are getting 'no signal' on your TV or you require a completely new aerial system to 6 or more rooms in your house we are the fitters for you. Our NVQ qualified engineers will always look to the best solution for you.

We are Sky dish installers for the Warrington area, this means that we can set up your Sky system, fit or repair a satellite dish, realign your dish if it's been blown about by the wind and you are no longer getting a signal. We reprogram sky receivers if they are playing up and can do anything satellite related such as Freesat or other foreign types of system for you.

With 10 years plus of experience as satellite TV engineers there is nothing we can't do within reason. We will even fix your dish on a post at the end of the garden for you if it's the only place on your property that gets a signal. We do our utmost to provide you with a service that is second to none, & of course all of our work and equipment comes guaranteed.

Ever since the flat screen TV came out we have been hanging these televisions on walls. We pride ourselves in the fact that we always get them level, (not an easy thing) & that all of the TV wall mountings we have done look good after we're finished. Whether you have a small 17" TV or a 72" we have the knowledge, experience and expertise to fit your TV securely.

We can also provide and fit trunking to hide away the unsightly cables so the whole thing looks good. We can fit your Telly on either a stud wall or a solid brick wall and we also provide decent quality TV wall brackets ideal for the TV and wall for your install. You don't want to leave this to an amateur, when we put up a TV it stays up.
