meters

how do we use your meter reads?

We use your last two actual reads to estimate your read for the end of this billing period to estimate your next bill.

If the status of your meter is showing red , this means we have been unable to take an up to date read, this could be adversely affecting your estimates for future bills. It would be beneficial for both parties if you are able to submit reads for any red status meters listed in the charges section.

submit a meter read

We take a reading once every 6 months to keep your billing accurate, you are also able to submit meter readings as frequently as you wish online if you would like to help us keep your bills up to date. Please make sure it is safe to access your meter before taking a read.

You can do this at
